

COMPUTER PROGRAMMING (ENGLISH)

Istanbul Gelisim University
Istanbul Gelisim Vocational School

“ *In our program; courses are given on system design and development, establishment and management of computer networks, system and database management, preparation and presentation of web pages.* ”

Lect. Adnan Kürşat TEKE
Head of Computer Programming (English) Program

Istanbul Gelisim
Meslek Yüksekokulu

The Aim of The Program

The most needed subjects in information technologies such as visual programming, database management, internet programming, operating systems, computer hardware are transferred to students depending on the course programs and this information is applied in computer laboratories in order to provide practical learning.

— “ —

Computer programmers need to be individuals who adapt themselves to the ever-changing software world, follow developments, and are not afraid of change and learning.

— ” —

Future of the Program

It is aimed to train individuals who can be employed in companies that produce services in the sector, provide computer software and web software services, related public institutions and organizations, who can contribute to the workforce of our country by being equipped with the features that will develop hardware and software on information technologies needed by the industry, and who can take an active role in decision making and process planning.

Curriculum Information

Istanbul Gelisim University, Istanbul Gelisim Vocational School, Istanbul Gelisim Vocational School Computer Programming (English) Program has a normal education period of two academic years and the total minimum credit amount to be completed depending on the student workload is 120 ECTS.

In the first two semesters, our students take the courses taught in common in our vocational school and the basic introduction to the field in a professional sense. Starting from the third semester, the focus is on vocational courses and our students begin to take elective courses as well as the compulsory courses required in the vocational sense.

Academic Staff

Lect.
Adnan Kürşat TEKE
Head of Computer Programming
(English) Program

Assist. Prof
Ceyda Cevahir YILDIZ
Computer Programming (English)

Lect.
Aysun YILMAZ KIZILBOĞA
Computer Programming (English)

Lect.
İpek Ebru KARAÇAY
Computer Programming (English)

Sectoral Collaborations

In its pursuit of excellence in education and research, our university attaches great importance to collaborating with public, private and non-governmental organizations. These collaborations enable us to build a stronger future by sharing our knowledge and resources and working together to achieve common goals.

Internship

At the end of the second or fourth semester, our students advance in their career journey by completing a 30-day summer internship in order to graduate.

Career Opportunities

Our graduates can work in industrial organizations, software companies, computer marketing and technical support companies, insurance companies, banks, commercial organizations, internet service providers, internet publishing companies and radio, television, stock exchange, transportation, logistics companies in various information processing and software tasks, as well as computer training, marketing, consultancy or they can work in their own business (by establishing a company or freelancing).

Activities

Our university and our program contribute not only to gaining knowledge and skills, but also to progressing towards becoming an individual who will make his/her own difference and benefit the society. Our students have the opportunity to develop their skills in various workshops, learn by having fun at festivals, raise awareness in social responsibility projects and participate in unforgettable events, and have the chance to show themselves in competitions. Our activities develop cooperation and team skills. They also offer career opportunities.

The activities carried out were as follows:

- Workshops
- Festivals
- Trips
- Seminars
- Symposiums
- Exhibitions
- Social Responsibility Projects
- Conversations
- Sustainability Events

Double Major Opportunities

The purpose of the double major program is to enable students who successfully complete their major programs to study in a second major program free of charge. Students who have a GPA of 2.90 out of 4.00 in their major program and who are in the top 20% of their undergraduate/pre-degree program can start the second major diploma program free of charge.

Erasmus+ Program

With Erasmus+, the European Union's (EU) grant program in education, youth and sports opportunities, our students can access various opportunities such as education, training, internship, professional development, non-formal learning-based youth activities abroad.

Research Centers

Innovative, technological and sociological studies are carried out in many different branches with 20 different application and research centers within our university. In addition, thematic research groups carry out studies that will contribute to science in 10 different fields from food to construction, automotive to health.

IGU Technology Transfer Office, which was established to provide the necessary information and guidance for academicians, researchers, students and graduates to start their own initiatives, listens to all students who say “I have a project” and provides all kinds of opportunities to realize these projects.

Workshops, Laboratories and Studios

- 6 Computer Laboratory-PC
- Computer Laboratory-MAC

DGS Course

Istanbul Gelisim Vocational School organizes the Vertical Transfer Examination (DGS) Course for our students free of charge every year. In the course, topics for DGS, especially basic mathematics and geometry, are covered.

Our students can register for our course, which is organized for second year students of our vocational school, by applying on the announced dates and prepare for DGS free of charge.

English Course

Istanbul Gelisim Vocational School, which operates with the aim of increasing the human equipment of our students within the framework of its vision of continuous development, opens vocational English courses for our students. The courses aim to provide an education based on social sciences and natural sciences. In the courses, our students' basic English knowledge is reinforced by working on field-specific English texts.

Our English courses are completely free of charge and contribute to increasing the human capital of our students.
