## STAKEHOLDERSHIPS AND PROTOCOLS

In these new times when higher education costs are increasing and competition is increasing all over the world, it has become almost impossible for higher education institutions that fail to follow and implement innovative ideas and produce values that contribute to the society, to succeed and even to survive in the long term.

Therefore, in today's world, where the reasons for the existence of higher education institutions are questioned again, producing innovative values through universities and contributing to the environment sociologically, ecologically and economically is of critical importance for societies. Therefore, it is among the most important strategies adopted by universities to communicate with their environment and do interactive works in order to reach universal knowledge and convert this knowledge into a useful accumulation. In a sense, it is possible for universities to become important actors by providing their visibility in international platforms and to become one of the leading institutions thanks to these effective strategies. Giving importance to regional and cross-country diversity, cooperating with industry, public and civil organizations, developing common innovative values by communicating with other higher education institutions is also the most beneficial in terms of resource allocation and is very important for sustainability policies.

According to the research and education needs of İstanbul Gelisim University, the information and documents of the collaborations covering 2018 are classified and reported in a certain category below.

### Academy - Academy Collaborations

Like every other academic institution in the international platform, Istanbul Gelisim University wishes to go further in the effort of Internationalization. Collaborations are made with transnational universities in order to increase the diversity of international students, to make exchanges between qualified and experienced faculty members, to conduct international education programs effectively, to reach universal information easily and to allow the circulation of knowledge and experiences, to conduct comprehensive research and of course to strengthen the relations abroad. it is signed.

Istanbul Gelisim University has a total of 95 bilateral cooperation agreements, 85 of which are from Europe. Below is a list of university partnerships covering the duration of the protocol 2018. A copy of the protocols signed with the listed universities is provided in Annex 1Aa and 1Ab.

### Protocols of International Relations in Europe Region

| No | Institution Name   | Country        | Dates     |
|----|--|----------------|-----------|
