

## BOOKCITES

Thousands of academic books, book chapters and full text symposium books are published every year. It was impossible to reach the millions of citations in these publications. BookCites is a book citation directory that focuses solely on academic books and contains book citations.

Bookcites has easy interface and multiple search options. It is possible to search not only the citation but also the title and the full text. Advanced statistics such as the number of institutional citations, number of usage detail are presented in detail.
