

ISTANBUL  
**GELISIM**  
**UNIVERSITY**

## History

In 2008, our founding foundation **“Gelişim Education Culture Health and Social Service Foundation”** established a Vocational School named “Istanbul Gelisim Vocational School”. On the letter of Ministry of National Education dated 08/07/2008 and numbered 17261, according to the 2nd Annex of the Law No. 2547 of the Council of Ministers on 14/07/2008, our Vocational School was established and started education. Based on Law No. 6114 of 17/02/2011 **“Istanbul Gelisim University”** was established and continues its education activities within 5 Faculties, 1 Graduate School, 3 Schools and 2 Vocational Schools in the academic year of 2019-2020.

# Being a Gelisim Member

- To provide competent and well-equipped education to our 30846 national and international students in terms of intercultural education and training discipline,
- To provide international education opportunities to the students while having the most accredited departments in Turkey,
- To be able to live away from the family but in the family environment,
- Feeling cared for in student-oriented education,
- Studying abroad for a semester or a year at different universities in the world,
- To gain a sense of leadership and responsibility with the mentoring system,
- To meet the language education in the preparatory class with the free "Weekend School" program so that our students studying in English can learn more easily,
- To get the reimbursement for the course they attended for the undergraduate and associate degree students who study at Turkish departments when they go to any foreign language courses to improve their foreign languages and take the YÖKDİL exam at the end of the course,
- Taking online courses through Skype by world-renowned universities in the UK by expert academicians in parallel with the department and curriculum,
- Graduating with two diplomas by doing a double major program free of charge in order to expand their academic knowledge and to work interdisciplinary,
- To realize national and international organizations through student clubs,
- Providing the office furniture of the alumni who have founded their own workplace after graduation by the Board of Trustees,
- To direct students to research projects from the first year in order to complete a project before graduation,
- To study with faculty members through research and entrepreneurship opportunities and to conduct projects worldwide,
- To be able to make a transfer with scholarship if they meet the required conditions even if they could not enter the desired department,
- Supporting students to make an academic career,
- To be able to receive practical training in our laboratories equipped with high technology,
- To do an internship in contracted institutions in addition to a strong education to prepare for business life,
- Receiving a minor certificate in accordance with their interests free of charge,
- To study at a university that is intertwined with the city and integrated with the city's name.

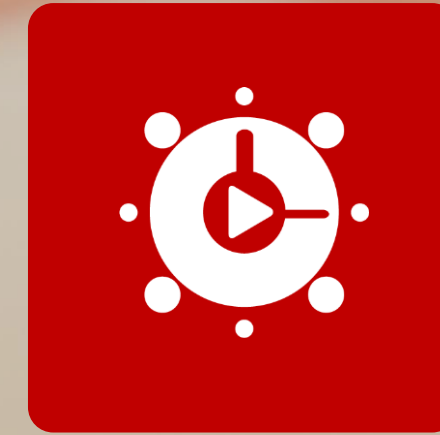

# ACCREDITATION

## What Is Accreditation?

Having accreditation for universities means documenting the quality of education. Universities have their education approved in terms of "quality" by applying to both national and international institutions.

## What is the Importance of Accreditation?

The compatibility of a program accredited by an international organization with higher education programs is documented. International accreditation gives university diplomas international validity, enabling the mobility of students and academics, and enabling the development of scientific projects.

**3 Program**

IGU has made a very ambitious breakthrough in 2017, making significant investments in its physical capacity, human resources and the possibilities provided to students to become a "Reputable World University". It had applied for German, British and US accreditation agencies and subjected to the accreditation evaluation 87 departments voluntarily, including health sciences, sports sciences, social sciences and engineering sciences. As a result, Istanbul Gelisim University has got accreditations. As a result of the quality assurance evaluations, a total of 63 programs of Istanbul Gelisim University were examined in detail by the international experts' committees appointed by organizations such as AQAS, AHPGS, PEARSON, ABET and found to be accredited. Istanbul Gelisim University, which attaches great importance to internationalization in education, offers its students and graduates the opportunity to continue their education and work anywhere in the world with international accreditation and protocols signed with foreign universities.

**\*AQAS:** Founded in 2002 in Germany and a member of the European Association for Quality Assurance and AQAS is an organization with more than 5,000 auditing programs worldwide. It has accredited training programs in more than 90 German universities. The accreditation it provides confirms that the accredited program meets European standards and principles.

**\*AHPGS:** Germany-based Accreditation Agency in Health and Social Sciences (AHPGS) accredited training in health, social sciences and other fields. AHPGS, a member of the European Association for Quality Assurance, has completed accreditation of more than 1,200 programs in more than 120 countries.

**\*PEARSON:** British institute for international accreditation of educational programs, especially taught in English for foreign students.

**\*ABET:** US-based Accreditation Board for Engineering and Technology (ABET) supervises the engineering faculties of universities.

Times Higher Education Asia (THE) 2019, known as the Oscars of higher education, finished the determination of the best universities in Asia. Istanbul Gelisim University (IGU), took place as the only university from Turkey in the final of the category of 'Internationalization Strategy of the Year' where 7 universities from around the World were shortlisted.

The evaluation of the “Internationalization Strategy of the Year” category is based on the success achieved in establishing a strategic approach to institutional partnerships, international activities, international staff and student recruitment.

Istanbul Gelisim University, being shortlisted for the final of 80 Asian universities from 21 countries, has registered its success with the steps taken in the field of “internationalization”.

<https://gelisim.edu.tr/en/news/only-candidate-from-turkey-among-the-bests-of-the-world>

The international prestigious higher education ranking agency Times Higher Education (THE), known as the 'Oscar of Higher Education', announced the 'University Impact Ranking 2020', in which universities aim to measure their contribution to the sustainable development of societies. Being ranked 96th among the World's top 100 universities providing high-quality education Istanbul Gelisim University (IGU) became 1st from Turkish universities. In the general ranking, IGU is ranked among 600 universities in the world and left 19 Turkish universities behind.

**CIRIEC-Turkey** is a non-profit organization founded in 2017 as an active member of CIRIEC International and has its head office at Istanbul Gelisim University.

CIRIEC-Turkey aims to raise awareness in Turkey's third-sector which has started to gain momentum over the past fifteen years. CIRIEC-Turkey promotes and encourages scientific research, reports and activities in the fields of public, social and cooperative Economy. The main focus of the research and activities of CIRIEC-Turkey is to highlight the needs and dynamics of the third-sector, exchanging ideas with sector representatives, researchers and practitioners.

Activities of CIRIEC-Turkey intend to bring academics, practitioners and policy makers together in order to contribute to a sustainable, just, and efficient economy at both national and international levels. CIRIEC-Turkey intends to organize events to engage the international community to learn about and collaborate with the third sector in Turkey.

**Ciriec-Turkey is active on various areas:**

- Emphasizing the importance of the third sector in the economy,
- Stimulating the cooperation between the public, private and civil sectors,
- Encouraging the relation between academics and cooperative, associations, public companies on public, social and cooperative economy,
- Conducting academic researches on public, social and cooperative economy,
- Strengthening the international collaborations around the third sector.

# OPPORTUNITIES

Istanbul Gelisim University is one of the important research centers and is a different and distinguished learning environment for associate, undergraduate, graduate and doctorate students in many academic and professional fields. IGU, which makes a difference in its field with its human, science and success-oriented methods, provides opportunities to students who are entitled to its own structure in various branches.

## Study Abroad Opportunities

## Scholarship Opportunities

# Opportunities

## Study Abroad Opportunities

International lecturers and students support research and teaching on global topics. Our university aims to establish academic relations with many countries and regions.

- Language education at more affordable prices with the education consultancy that the university has contracted abroad.
- The departure / arrival flight tickets of our students who go abroad for language education individually are met by our university.
- Taking lectures from university lecturers abroad with video conferencing
- To take on-line courses with the support of Skype from world-renowned universities in the UK by expert academicians in parallel with the department and curriculum.
- Opportunity to study in European countries for at least one semester, maximum 1 year with Student Exchange Program Erasmus +

# Opportunities

## FREE DOUBLE MAJOR AND MINOR

### MINOR

It refers to the program that allows the student enrolled in a diploma program to receive a certificate (minor certificate) that does not replace the diploma by taking a limited number of courses within a different diploma program within the same higher education institution. The student can apply to the minor program at the earliest in the third semester and at the beginning of the sixth semester at the latest. Students who have successfully completed all credit courses in the undergraduate program can apply to the minor program.

### DOUBLE MAJOR

The purpose of the double major program is to ensure that students who carry out their major programs successfully receive a free diploma in a second branch at the same time. Students who have a general grade point average of 2.72 out of 4.00 in the major program and who entered the 20% success rate in the undergraduate / associate degree program can start the second major diploma program free of charge.

# Opportunities

---

## Full Support to Education and Projects

Istanbul Gelisim University inspires our staff, students and partner community to transform how the world is understood, how knowledge is created and shared, and how global problems are solved. Our university aims to develop all fields of knowledge and learning at the highest level and to carry the products resulting from its efforts to the world.

- Graduating with two license certificates by doing a free double major
- In case the student is not placed to the desired department, transfer with a scholarship when the necessary conditions are met.
- To receive practical training in our laboratories equipped with high technology
- **Supporting our students with a holistic approach with the “I Have an Idea” project**
- Providing the office furniture of graduates who set up their own workplace after graduation.
- To meet the language education in our preparatory class with the free "**Weekend School**" program so that our students studying English can learn more easily.

# School of Foreign Languages

With its physical and technical infrastructure and its qualified, professional education system, Istanbul Gelisim University, the School of Foreign Languages provides its students with undergraduate programs as per the requirements about English and Russian languages. Our mission is to become a school that applies an education system in the light of Ataturk's principles and reforms; committed to national, moral and ethical values; is modern in foreign language education; follows the most recent literatures, approaches, methods and technical equipments; applies an interactive education model so as to enable its students to progress more rapidly and easily in foreign language training; differentiates with its academic staff; provides its students with the appropriate environment to contribute to their professional and social development; collaborates with various institutes and organizations; stands as a part of the global changing and improvement; takes science and logic as its basis; contributes to science, economy and culture in the country; raises students that can represent our country at international platforms; and contribute to the universal peace, as well as to be ranked among the most preferred schools for its educational level.

## English Preparation Program

Our English Preparatory Program, which operates in line with the European Languages Common Framework Program, aims to learn and use language skills more effectively by focusing on the student's classroom and out-of-class performance instead of a memorized education. Online Language Learning Platform allows students to follow the courses on the internet, to take part of the exams on the internet, and to provide students with unlimited language learning opportunities independent of time and place.

## Weekend School

The aim of the program is to remove the students from the stress created by the classroom environment, to reduce the mental barriers and to gain a habit of speaking fluently in more comfortable, self-confidence environments. The program, which transforms the formal relationship between the teacher and the student into a more warm and sincere peer relationship, reduces the speaking hesitation in the foreign language, motivates the students to speak more fluently in a natural and comfortable environment, and ensures that the communication with the treats given between them continues outside the classroom.

## Pearson Certificate of Achievement

In addition, the program has been ACCREDITED by the Pearson Assured accreditation company, which operates almost anywhere in the world. Our students receive English education in a program with all processes under Quality Control Assurance and certify their achievements with the "Pearson Certificate of Achievement" which is valid abroad, and they can continue their education abroad if they wish.

GELİŞİM MESLEK YÜKSEKOKULU

# Istanbul Gelisim Vocational School

It is a comprehensive Vocational School aimed at providing students with excellence in education. Our Vocational School is one of the leading public and private resources of the region, offers programs based on world-class research, develops shared knowledge and contributes to the region's industry, culture and economy.

## IGU in NUMBERS

Having adopted "Development" policy in all needed areas in Turkey and the World, IGU, has graduated 28 thousand 939 students trained with leader qualifications in conformity with the principles and procedures of accreditations it has, until today. **In cooperation with more than 100 world universities, Istanbul Gelisim University motivates undergraduate, associate, master and doctoral students to become international.** At the campus area located in Istanbul – Turkey's and the world's financial and trade center, Istanbul Gelisim University offers a huge research complex consisting of more than 100 laboratories to the service of its students. There are also 21 research centers and 81 student clubs that enable students to engage in social, cultural, scientific and sporting activities outside the classroom.

# CERTIFICATE of EFFICIENCY and COMPETENCE

at GELİSİM

## School Approval Certificate recognized by the General Directorate of Civil Aviation.

Within the framework of the cooperation of YÖK and GDCA in November 2017, it was decided to look for the "Recognized School" requirement from the Higher Education institutions that train "Aircraft Maintenance Technician". As of Summer 2018 with extremely limited Higher Education Institutions in Turkey "recognized school" it has been certified. Istanbul Gelisim University has been certified as "Recognized School" within the scope of "Aircraft Body Engine Maintenance Department" at the undergraduate programs level and "Aircraft Technology Program" at the associate degree level.

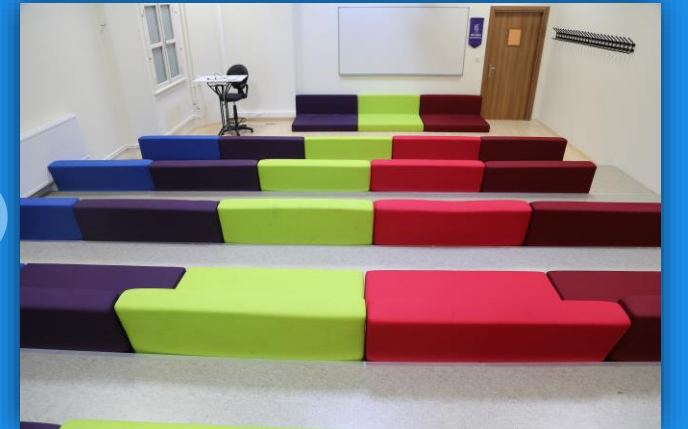

# LIFE AT CAMPUS

# CAREER DEVELOPMENT CENTER

For Individuals  
Making a DIFFERENCE

Imagine, Plan, Manage

The purpose of the Career Development Center is to help students to develop their skills in line with today's expectations in order to achieve success in their business life after graduation, to make short, medium and long term career plans for the future and to achieve these goals. In this process, our center aims to advise the university students on issues such as personality recognition, determination of interests, determination of targets, sector/institution recognition related to business life, career development, preparation for business life and decision making.

It also aims to bring high-qualified individuals accoutered with wide range of knowledge and skills ranging from social life, art, engineering, health, economy, trade, politics, sports to business management, and thus to make a significant difference to contribute to the development of quality of life.

## *For our students and graduates*

- To undertake career counseling in line with the objectives and goals,
- Carrying out competence studies to better know themselves,
- Carrying out career planning in line with the needs of the sector with talent, knowledge, skills, interests and desires,
- To be a guide for candidates with high personal awareness and intellectual knowledge,
- To make sure that there are candidates who will make a difference in business life and interviews,
- To create an interactive process by bringing together the pioneers of the industry and students,
- To support them in preparing for the situations they will encounter during the interview stages,
- Organizing trainings aimed at gaining some practical skills that can be used in working life and daily life,
- To support the implementation of joint career development, job and employee provision projects and programs by developing stakeholder relations and cooperation with relevant private sector, public institutions and organizations,
- Organizing internship places, technical and professional trips by contacting companies related to their interests in line with their professional development,
- Supporting them to be individuals with goals, taking planned steps and acting rationally, actively participating in projects that create added value in the process of corporate and social development,
- To organize studies in order to be able to express themselves correctly and effectively both in written and verbal ways and to be successful in interview and evaluation processes while entering the business life.

# Career Development Center

**For Individuals**

**Making a DIFFERENCE**

**Imagine, Plan, Manage**

## ***Career Counseling and Career Planning***

The subjects that our students and graduates can discuss with career counselors at all stages of their career planning and development are shaped within the following framework.

### ***Career Counseling***

- Implementation of Personality / Interest Inventories and Career Oriented Interpretation
- General Career Counseling
- Undergraduate and Graduate Process Planning
- Preparing CV, Reference Letter
- Interview Preparation
- Sector Information

### ***Job and Internship Announcement***

Career Development Center provides an online platform where you can announce job and internship opportunities to our students. It publishes job and internship announcements free of charge throughout the year on our website and also offers an online platform that you can make an announcement over the student information network.

### ***Mentoring Programs***

With the mentoring program we provide our students with the opportunity to participate in management processes and improve themselves during their education. Our students and all academic and administrative staff are included in closer communication processes.

With the training activities that we organize, individuals with developed leadership characteristics, acting in accordance with the team spirit, with high self-esteem and firm standing on the ground are raised. The mentoring program not only facilitates the transition of students to business life, but also enhances the communication between the university administration and our students and introduces a participatory management model and decision-making mechanism.

### ***Career planning***

- Evaluation of individual characteristics
- Assessment of career opportunities
- Determination of individual characteristics and career opportunities
- Determination of individual needs and objectives
- Applications

### ***Events & Seminars Related to Career Development***

These are activities organized at certain periods throughout the year in order to develop different sectors, business lines and individual skills.

- Company / Institution Introduction Interviews
- Field Visits
- Human Resources / Recruitment Processes
- CV Writing Techniques
- Interview Rehearsals
- Leadership Trainings
- Team work
- Time and Stress Management
- Mentoring Programs

## DIRECTORATE OF HEALTH, CULTURE AND SPORTS

Activity purpose of Istanbul Gelisim University, Department of Health, Culture, and Sports is to make the students' time within the university valuable and different; to support their personal development meeting their health, sports, cultural and other social needs. The Department of Health, Culture, and Sports is a service unit that meets the needs of the students on social, cultural solidarity and guidance, sports; and also an application department where applications and research are carried out in order to support education and training.

In the 2018-2019 academic year, the SKS Department held 719 events. In order to make life in the university meaningful, it meets with the students in many activities such as sports, health, culture and arts.

### GOALS

- To evaluate spare time of the students according to their work, recreation and interests,
- To enable them to gain new social and cultural interests while studying.
- To provide services that enable the development of talents and personalities in a healthy way,
- To train individuals who care about their mental and physical health,
- To enable them to gain regular and disciplined working, resting and entertainment habits.

Health Services affiliated to MedikoSosial Directorate established within the body of SKS (Health, Culture, and Sports) Department provide health services with 1 Doctor, 5 Nurses, 1 Psychologist.

As Istanbul Gelisim University, our cultural goal is to encourage our students and staff to cultural activities, to direct people interested in cultural activities to cultural activities and to enable them participate in the activities they are interested in. We provide and support the opportunities, lecturers, venue and time adjustments that students want. In this context, it is not only hosting events at Istanbul Gelisim University, but also outside the institution, enabling students to participate in the events, and planning the announcements of the events taking place within the institution.

During the 2019 & 2020 Academic Period, our 81 Student Clubs were active.

# CONTINUOUS EDUCATION CENTER

Istanbul Gelisim University Continuous Education, Application and Research Center focuses on lifelong education and the needs of professional life, and provides privileged education and training by academic and professional knowledge, equipped and experienced trainers in its modern, contemporary education and training environment.

Apart from the trainings that enable individuals to develop themselves and specialize in business life and provide professional and personal development, IGUSEM (Continuous Education and Research Center) also provides corporate training and consultancy to institutions that want to adapt to the information age and globalization environment. IGUSEM which aims to provide useful and important to society trainings that any individual from all ages and occupational groups can participate, adopts the highest level of quality approach in the lifelong education activities after the formal education with its certificate programs, workshops, conferences and seminars, by taking the scientific approach, reliable and impartial information as its principles.

# International Collaboration

## Exchange Programs

Exchange Programs aim to bring together various cultures in academic and social context by strengthening cooperation among higher education institutions. Exchange Programs are programs that offer maximum 12 months of education and / or internship in another country, aiming at strengthening the personal development of the participants and increasing their employment opportunities.

The exchange programs carried out by the International Relations Office also include various projects such as the participation of personnel in the mobility of training and teaching in an institution abroad, joint conferences and the organization of multidisciplinary activities. Exchange programs contribute to the participants both academically and socially.

## Exchange Programs contributes to

- Increase cross-country and corporate cooperation
- Provide the intercultural interaction of students and trainers
- Increase the professional and personal skills of the participants
- Increase the international recognition
- Learn foreign languages
- Provide effective communication and make students express themselves well
- Understand and appreciate differences
- Gain self-confidence and recognize their own limits
- Get to know different cultures closely

Istanbul Kemerburgaz University Line Follower Category Turkish Winner

Bahçeşehir University Robot Wars and 1 st in Turkey  
Line Follower Category 1st, 2nd, 3rd places in Turkey

## PHARMACEUTICAL DEVICE PROJECT – ECZAMATİK

The Eczamatik project was developed by Istanbul Gelisim University to provide an alternative solution to the on duty pharmacy search problem. In a study conducted by the University, difficulties were determined in access to on duty pharmacies in the world and Turkey. In order to solve this problem, the Eczamatik (pharmaceutical device) project was initiated and prototypes were produced.

The practical electronic pharmacy produced within the scope of the project will be open 24/7. Citizens who find it difficult to find a pharmacy on duty will be able to get the medications they need by entering the information prescribed by the doctor into Eczamatik. With this developed project, it will be available to provide medicines in places where there is no pharmacy and it is difficult to find pharmacies on duty. Also, citizens will be able to see the price of the medicines, total price, and will be able to pay by cash or credit card.

With the “Eczamatik” developed to be resistant to all kinds of force, the most used medicines will be stored at the appropriate temperature and will be delivered to the recipient in the best way upon demand.

## BABAYİĞİT AND COLLISION SYSTEM

The “Babayiğit” electric car project, which is prepared by Istanbul Gelisim University and supported by TÜBİTAK, aims to bring a solution to the traffic in Istanbul and put its signature on a first. The “Babayiğit” project, which was prepared in 2014 together with university students and faculty members, operates with a rear propulsion system and is driven by two Hub motors on its rear wheels. The mechanical structure of the vehicle is made of aluminum and the outer body is made of carbon fiber material. Babayiğit, a two-seater vehicle, is a model that has emerged on the classic car line and continues to gain people's appreciation.

“Collision Reduction System”, which reduces collision severity in vehicles during the accident and aims to create a safer environment, was produced by Istanbul Gelisim University. The system that reduces collision intensity, is an auxiliary braking system that significantly reduces the severity of the collision engaging spontaneously when the possibility of collision in vehicles increases.

## CANE FOR VISUALLY IMPAIRED

The project is a cane and guiding route system that enables the visually impaired people to follow the route by giving an audible warning as a result of the information coming from the infrared sensors controlled by microprocessor placed on the route where starting and ending points are known. Within the scope of the project, a new signal path design and a new cane design have been realized for visually impaired people.

The Ministry of Family and Social Policies and IT Accessibility Commission officials of the Governorship of Istanbul visited the university and examined the cane and other works carried out by the Technology Transfer Team on site. The Provincial Vice Director of the Ministry of Family and Social Policies Halis Kuralay and his team tried the technological cane designed for the visually impaired construction works of which were completed at the Technology Transfer Office and conveyed their positive opinions and suggestions for its improvement.

Halis Kuralay and his team stated that they would like to take part in the future stages of the project. The Project was presented in “Turkey with patents” competition organized by Turkish Patent and Trademark Agency.

## FLYING CAR

In May 2018, the manufacturing steps of the Flying Car project were taken demonstrating that Turkey and Istanbul Gelisim University in the good sense can use technological developments and it can compete with countries with advanced technology in the World. Within the scope of the project, the mechanical laboratory of the university was actively used in the manufacturing process, which was integrated with the companies within the scope of university-industry cooperation.

At the end of June, the main body of the Flying Car project was completed and so the Flying Car project was no longer a dream but a real structure. Flight tests of the Flying Car project started mainly in July, completing 1.5 months of security testing and improvement processes of electronic equipments in line with hard work. With the month of January 2019, with bodywork produced depending on the design, work of completing Turkey's first flying car is accelerated.
