NEWS

The startling result of the study in Istanbul; street food is dangerous

August 17 2020

Research conducted in Istanbul revealed that foods such as kokoreç, rice, chicken doner, boza and cold sandwiches sold on the street pose danger. Bacteria that cause typhoid, such as salmonella, were detected in the samples taken as a result of the research conducted for 1 year.

Street flavors that reflect the food culture of every country and region, are colorful and accessible at all times and are a part of low cost food culture; It is preferred for many reasons such as the fast and practical preparation phase. The research conducted in Istanbul revealed the microbiological risks that may arise from the consumption of street delicacies. Pathogenic bacteria such as "Staphylococcus Aureus" were detected in 65 percent of the foods tested, "E.coli" in 25 percent, and "Salmonella" in 10 percent. While salmonella was encountered in products such as boza and cold sandwiches, it was found that there were "Staphylococcus Aureus" and "E.coli" bacteria in chicken rice and mixed toast.

The coronavirus is increasing in the countries with income injustice**August 19 2020**

Evaluating countries such as USA, Brazil and India, which are among the countries where coronavirus is most common in the world, Asst. Prof. Dr. Onur Özdemir said: "When looking at the total of cases in these three countries, it is seen that it is at the top of the world ranking in income inequality."

Stating that households and individuals in the lower income group have problems in accessing the health services and taking advantage of available resources, Dr. Özdemir from Istanbul Gelisim University said: "All the arising problems trigger the increase of cases more than usual in countries with high income inequality and accelerate the current trend."

IGUZEB

Istanbul Gelisim University Distance Education

Due to COVID-19, distance education process has started in universities in accordance with the decision taken by the **Council of Higher Education (YÖK)**. Istanbul Gelisim University **Distance Education Unit (IGUZEB)**, which has been operating since 2016, works at full capacity in order to continue the educational life of students efficiently in this process, with its technical infrastructure and experience.

IGUZEB has made that its vision to increase the knowledge and experience of our faculty members to the level of **international e-learning standards** with the use of distance education technologies aiming the life-long and unlimited learning awareness of distance education as student-centered, independent of time and place. In this context, it continues to work on digital content development with technologies based on e-learning, by providing the necessary technical support to existing **associate, undergraduate and graduate programs** carried out within our university.

In this challenging process that our country and the world live, our students can follow their lessons with the distance education system and access **the course content such as video, notes, test** prepared by our faculty members with the support of digital infrastructure. They can view their homework and deliver their homework to their lecturers through the same system.

The system provides the opportunity to attend live classes and communicate simultaneously with their lecturers, and then watch the course video again. Our students can enter the exams of the courses they are responsible for online. In the exam system, **questions and time have been meticulously prepared** in accordance with this infrastructure. All these materials are accessed through a computer, tablet or mobile device with internet connection. If our students have any questions about the process, after they send support requests, our personnel will help them.

As IGUZEB, we work to provide the most efficient education by using of all the possibilities of **digital technology** in order to avoid interruption of education.

THINGS TO KNOW

ABOUT NEW CORONAVIRUS

All necessary measures are taken for the **coronavirus** revealed in Turkey and the World at **Istanbul Gelisim University**. **Things to know about coronavirus are as follows:**

What are the new coronavirus symptoms?

- The most common symptoms are **fever, cough and respiratory distress**.
- In severe cases, **pneumonia, severe respiratory failure, kidney failure and death** may occur
- Incubation period is between **2 and 14 days**.

How is the virus transmitted?

- It can be transmitted by the contact of the droplets caused by **coughing and sneezing** with the contact of the **mouth, nose and eyes** of other individuals in certain environment and by touching the surfaces where the droplets adhere and taking hands **into the mouth, nose or eyes**.

What to do to be protected from the virus?

- When **coughing or sneezing**, the mouth and nose should be covered with a **disposable tissue**, if there is no handkerchief, the mouth should be closed with the **upper sleeve or elbow**, not with the palms.
- **Handshaking and hugging** should be avoided.
- **Mouth, nose and eyes** should not be touched with dirty hands.
- Hands must be washed for **at least 20 seconds** in accordance with the **Handwashing Instructions** found in the toilets. In the absence of water and soap, **alcohol-containing hand antiseptics** should be used. **Cologne of 70-80 degrees** also serve as disinfectants.
- Offices and classrooms must be **ventilated hourly**.
- Places frequently used by many people such as common areas and door handles should be **disinfected every 2 hours**.
- Hands **must be washed** after using **public transportation**.
- Because the virus progresses faster in people with low immune system; **a balanced and healthy diet** is required. Foods **must be washed thoroughly** before consumption.

What to do if there are symptoms?

- If you have come from countries with infections **in the past 14 days**, apply to the **nearest healthcare facility** by wearing a **surgical mask**.
- If you are **coughing, have a fever and have difficulty at breathing**, apply to the **nearest healthcare facility** by wearing a **surgical mask**.
- **Always wear your mask** when you are in the same room with **a person who is recommended insulation** at home.

PROTECTION AGAINST VIRUS IS IN OUR HANDS

THE MOUTH AND NOSE SHOULD BE CLOSED WITH PAPER TOWEL DURING COUGHING AND SNEEZE. IF YOU DO NOT HAVE ANY WIPE, THE INSIDE OF THE ELBOW SHOULD BE USED.
