

BEWARE IF YOUR CHILD IS 3 YEARS OLD AND STILL CANNOT ABLE TO SPEAK!

Stating that the neurological development in babies should be observed carefully, Child Neurology Specialist Prof. Dr. Ebru Kolsal also emphasized children with speech delay should be evaluated in terms of hearing disorders as well.

The neurological development of children is as significant as their physical development. While the weight and height gain of babies are regularly monitored during growth periods, their neurological development can sometimes be ignored. Speech ability, which is another important part of neurological development as well as the development of the child's head control, sitting and walking is among the factors of great importance. Children should be closely monitored in this regard. When it is noticed that there is a development of speech below expected, the expert should be consulted quickly and the underlying cause should be determined.

LANGUAGE DEVELOPMENT STARTS AT 3 MONTHS WITH BABBLING

Child Neurology Specialist Prof. Dr. Ebru Kolsal, Faculty of Health Sciences, Department of Child Development at Istanbul Gelisim University (IGU), emphasized the following: "Language development starts with babbling in a 3-month period and then progresses to forming regular sequential sentences. While a 9-month-old child should repeat syllables such as father and food, a 1.5-year-old child should use at least 6-8 words. By the age of 2, s/he should be able to form 2-word sentences, and by the age of three, 3-word sentences. Children with speech delay are usually likened to one of their family members and normalized with comments such as "His uncle also spoke at the age of 5". However, that language development should follow within normal limits as in other developments.

SPEECH DELAY IS THE FIRST THING TO BE NOTICED IN THE AUTISTIC SPECTRUM DISORDER

Children who are noticed to have language retardation need to be examined in detail. Dr. Kolsal also indicated, "Hearing test should be done in terms of hearing skills and neurodevelopmental skills should be examined. Speech delay is one of the first signs of autistic spectrum disorder. Hence, it is necessary to consult a specialist without losing any time in terms of autistic spectrum disorder, which can be rehabilitated with early diagnosis."

USING DRONE IN STOCK CONTROL PREVENTS MAKING MISTAKES

Evaluating the use of drones, which paves the way for the delivery and stock control technologies of the future, Asst. Prof. Dr. Kadir Mersin stated that the use of drone applications in stock control reduces the error margin to zero during the operation.

Drones, also known as Unmanned Aerial Vehicles, are used in many areas from cargo delivery to search and rescue activities during the Covid-19 pandemic. Asst. Prof. Dr. Kadir Mersin, a faculty member of the Logistics Management Department at Istanbul Gelisim University, indicated that drones, which started to be used in package delivery, particularly in the 21st century, also play an active role in counting goods in warehouses.

IT REDUCES THE ERROR MARGIN IN INVENTORY COUNT

Drones, which provide great advantages in small package transportation, in rural areas or in logistics processes where urgent and frequent shipments are obligatory, are also quite successful in accelerating and improving the current process. Asst. Prof. Dr. Kadir Mersin, faculty member of the Logistics Management Department, Faculty of Economics, Administrative and Social Sciences at Istanbul Gelisim University stated the following:

“Inventory control in a warehouse is done by several methods. One of these methods is inspection. In that method, the stock level is periodically observed by an experienced officer. It is a method frequently preferred by small businesses since it is cheap and simple. However, as the order quantity and level are completely dependent on humans, the error probability is high. If this process is done with the help of drones, the error rate decreases to zero.”

A WAREHOUSE OF 10 THOUSAND PALLETS CAN BE COUNTED IN 8 HOURS

Various robot companies provide counting services, enabling a logistics warehouse of 10 thousand pallets to count in 8 hours with the help of drones. Drones read the barcode on the pallet and transfer the information in this barcode to the logistics company's system. Thanks to these operations with drones, both time is saved and the work is handled without encountering any problems.

WINNERS HAVE BEEN AWARDED AT THE GREAT OFFENSIVE INTERNATIONAL SHORT FILM FESTIVAL

Winners have been awarded at the Great Offensive International Short Film Festival, where Director Ahmet Bikic, lecturer at Istanbul Gelisim University (IGU), Faculty of Fine Arts, Communication and Design, was the director of the Festival.

Dedicated to the 100th anniversary of the Great Offensive, the award and gala ceremony of the Great Offensive International Short Film Festival, organized under the auspices of the Afyonkarahisar Governorate, with the contributions of the Republic of Turkey Ministry of Culture and Tourism, Cinema General Directorate, was held at the Atatürk Congress Center.

3055 FILM APPLICATIONS WERE RECEIVED FROM 116 COUNTRIES

At the ceremony, Afyonkarahisar Governor Assoc. Dr. Kübra Güran Yiğitbaşı, Vice-Minister of Ministry of Culture and Tourism Ahmet Misbah Demircan, Afyonkarahisar Mayor Mehmet Zeybek, Afyonkarahisar Deputy İbrahim Yurdunuseven and Afyonkarahisar Deputy Ali Özkaya gave a speech by emphasizing the importance of the Great Offensive International Short Film Festival.

A total of 3055 films were submitted to the festival from 116 countries. Director Muhammed Furkan Daşbilek became the winner with his movie "On A River Bank" among the 24 films that made it to the finals. Murat Can Yağbasan won the second prize with his film "Apology", while the third prize was awarded to Director Muhammet Beyazdağ with his film "Everything In The Garden Is Rosy". The Best Screenplay Award with the scenario named "Mission Accomplished Soldier" was given to Prof. Dr. Nurullah Okumuş, who is a Rector at Afyonkarahisar Health Sciences University. The Jury's Special Award was given to Director Harun Üyüklü for his work "Gardaş(Brother)", whereas The Great Offensive Special Award was given to Director Yılmaz Kivanç for his documentary "Heyamola/ Road to Freedom".

STUDENTS FROM IGU ALSO PARTICIPATED

Within the scope of the festival, the students at Istanbul Gelisim University (IGU), Faculty of Fine Arts took part in many fields. While Işıl Gündoğdu was the coordinator of the festival, Melike Söalp, Melike Özkarakaş, Enes Dalgıç, Polat Bakırtaş, Hande Pala, Ecem Gürol, Yağmur Erdoğmuş and Sercan Ersin took active roles in various teams such as shooting, organization, sound and news writing.

In the program, besides the video screening, the awards were presented to the artists who supported the festival and valuable names who contributed. After the magnificent award ceremony, the valuable artist Esat Kabaklı gave a concert.

ABDULKADIR GAYRETLİ, CHAIRMAN OF THE BOARD OF TRUSTEES OF ISTANBUL GELISIM UNIVERSITY, VISITED DEPUTY MINISTER OF NATIONAL EDUCATION DR. NAZIF YILMAZ

Abdülkadir Gayretli, Chairman of the Board of Trustees of Istanbul Gelisim University (IGU), visited Dr. Nazif Yılmaz, Deputy Minister of National Education, in his office. During the visit, the projects that can be done in cooperation with the Ministry of National Education and the university were discussed.

COOPERATIONS WERE DISCUSSED

Abdülkadir Gayretli, Chairman of the Board of Trustees at Istanbul Gelisim University, who aims to advance the goal of becoming a world university with the successful ratings it received in the "Quality Education" category and the opportunities offers to his students both in the national and international, visited Dr. Nazif Yılmaz, Deputy Minister of National Education, in his office.

Abdülkadir Gayretli, Chairman of the Board of Trustees of IGU, informed Dr. Nazif Yılmaz, Deputy Minister of National Education, about the scientific and social studies of the university, its achievements on a global scale and the opportunities it offers to its students. During the visit, where new projects and collaborations were discussed, research and development activities were addressed as well. The opportunities offered by the university to entrepreneurs working in the fields of "basic science" and "engineering", such as IGUTEKMER (Entrepreneurship and Technology Center) and Scientific Research Projects Application and Research Center, and possible collaborations between the two institutions were reconsidered.

Abdulkadir Gayretli stated, " We appreciate our Deputy Minister Dr. Nazif Yılmaz's projects and works on the development of technological opportunities and innovation studies in schools. With this responsibility, we pursue our work in the national and international in order to develop more and more in the fields of technology and innovation to train the academicians and scientists of the future. We support the next generations in the light of innovation, research and development practices. We believe that they will achieve great success."

"WE ATTACH GREAT IMPORTANCE TO INTERNATIONALIZATION"

Abdulkadir Gayretli also added the following: "We attach great importance to internationalization in order to ensure the recognition and awareness of research and application centers in the global area. Asst. Prof. Dr. Erol Özvar, Chairman of the Council of Higher Education indicated that internationalization is determined as a goal by all universities. Hence, we are moving forward with a vision that is suitable for the era, developing and producing by offering world-class education and training quality."

ISTANBUL GELISIM UNIVERSITY GIVES "SPEED READING TECHNIQUES TRAINING" TO TEACHERS IN ŞANLIURFA

Istanbul Gelisim University gives "Speed Reading Techniques Training" to 200 advisory teachers in Şanlıurfa, which will last for 2 days. Prof. Dr. Bahri Şahin, Rector of Istanbul Gelisim University, who participated in the program, stated that the duty of universities is to be on the field.

Istanbul Gelisim University, in cooperation with Şanlıurfa Guidance and Research Center and Eyyübiye Guidance and Research Center, provides "Speed Reading Techniques Training" for advisory teachers in Şanlıurfa. The program, which will last for 2 days in total, was carried out with the participation of approximately 200 advisory teachers, Fevzi Kurt, Şanlıurfa Provincial Director of National Education, Prof. Dr. Bahri Şahin, Rector of Istanbul Gelisim University, Asst. Prof. Dr. Bülent Değirmenci, Head of Corporate Communication and Public Relations Department, Hüseyin Çelik, Southeastern Regional Manager of Istanbul Gelisim University and lastly, managers of Şanlıurfa Guidance and Research Center.

"UNIVERSITIES' MISSION IS TO BE ON THE FIELD, TO BRING ALL ELEMENTS OF EDUCATION TOGETHER AND SOLUTIONS TO PROBLEMS"

Making the opening speech of the program, Prof. Dr. Bahri Şahin, Rector of Istanbul Gelisim University, thanked the participants. By making a statement to the press after the opening speech, Prof. Dr. Bahri Şahin referred to the importance of their programs throughout Turkey and indicated the following: "We brought together all the stakeholders of education here. In other words, our Provincial Director of National Education, our Counseling and Research Center Director, branch managers, advisory teachers are here. We came from Istanbul as a university. This is not our first program. Similar programs were held in all provinces of Turkey. We believe that the duty of universities is to be on the field, to bring together all the elements of education and to bring solutions to problems. Our biggest problem is the quality of the educator. Universities have a great responsibility to increase this quality of educators. Therefore, all universities should be in the field on this issue.

We, as Istanbul Gelisim University, have taken this as our duty, and we desire to bring together these educators and academicians at the university in every province of our country to ensure mutual interactive knowledge sharing.”

“PROGRAMS ON OTHER SUBJECTS MAY CONTINUE IN THE FUTURE”

Rector Şahin also added, “Today's program is in Şanlıurfa. "Speed Reading Techniques Training" will be given to approximately 200 advisory teachers in Şanlıurfa within 2 days. In our next programs, there may also be subjects related to educational psychology or problems of secondary education. We want to bring together our expert lecturers at the university with our teachers on this subject. I saw great excitement and joy in teachers and that makes us very happy”.

PARTICIPANTS FOLLOWED THE TRAINING WITH GREAT ATTENTION

Educator Ferhat Şahin, who took the stage after the opening speeches, gave "Speed Reading Techniques" training practically to advisory teachers. In the program, which was quite entertaining, the advisory teachers tested themselves by getting information about speed reading techniques in line with Ferhat Şahin's instructions.
