

3-D JAW MODELING WORKSHOP IN DENTISTRY

Conducted by: Asst. Prof. Büşra DOĞAN & Research Assistant Sümeyye CANSEVER

Date and Time: 28.01.2022/14:00-17:00
04.02.2022/14:00-17:00

Venue: Faculty of Dentistry Preclinical Laboratory

Content

In our workshop on January 28, 2022, in the Faculty of Dentistry, our aim is to meet individuals who will rebuild themselves and the world by managing change correctly and rationally in our world, which is in constant transformation, in order to familiarize them with the dentistry profession, with dental materials, and with both entertaining and instructive content.

Meeting the students - Brief information about dentistry and teeth - Introducing plaster, loose, loose spoon and rubber tooth models to our students in the laboratory - Demonstrating the practical procedures to be performed by our students - Mixing plaster, casting into moulds and removing the frozen plaster from the models.
