

AVIATION WORKSHOP

Conducted by: Instructor Mehmet ATEŞ & Research Assistant Abdullah Can AL & Research Assistant Ahmet Devlet Özçelik

Date and Time:

25.01.2022 10:00-13:00 - 14:00-17:00 | 26.01.2022 14:00-17:00

01.02.2022 10:00-13:00 - 14:00-17:00 | 02.02.2022 14:00-17:00

Venue: Faculty of Engineering and Architecture Block D, Computer LAB 205

Content:

It is aimed to provide students with the basic dynamics of the aviation industry, which is in constant development. Contrary to the general perception of the aviation industry in the society, it is not just about airplanes, there are various categories in aircraft called airplanes. In this workshop, it is aimed to give our students basic information about aircraft and to design model rockets. Studies will be carried out to teach students that aircraft are not only mechanical, but also software and electrical accents as well as mechanical properties.
