ISTANBUL GELISIM UNIVERSITY GO BEYOND BORDERS

Istanbul Gelisim University places high values on internationalization in education and provides its students and graduates some splendid opportunities for their international education through international accreditation and agreements made with foreign universities.

Istanbul Gelisim University, which applied to German, British, and US accreditation institutions and voluntarily participated in accreditation evaluations from health sciences to sports sciences; from social sciences to engineering sciences, became the university in Turkey with the most internationally accredited programs.

As a result of quality assurance evaluations, a total of 65 programs of Istanbul Gelisim University were examined in detail by international expert committees appointed by organizations such as AQAS, AHPGS, PEARSON, ABET and found suitable for accreditation by spring 2018.

Erasmus+ for me literally meant 'challenge yourself'. In addition to seeing new places and meeting people from different cultures, understanding and getting adapting to the behaviors of your destination and trying to live in a place outside your own country, changes people positively. Erasmus+ was an adventure that contributed a lot to me both in terms of academic and English developments. I recommend everyone to experience Erasmus+. I think it was quite significant both academically and culturally.

I was in Poland for two semesters with Erasmus+ program. That was definitely the most precious nine months of my life. I have known wonderful people from various parts of the world, visited many cities, and gain some unforgettable memories which all of them where very precious. With this experience, where I gained a different perspective in academic terms, I learned how to carry out several different architectural projects at the same time. Erasmus+ mobility is the best experience you can have in your university life.
