LATEST NEWS FROM IGU

Istanbul Gelisim University Technology Development Center (**IGUTEKMER**), which was established to contribute to the production of new technologies and increase interaction and collaboration between entrepreneurs and companies targeting product development, has added a new activity to its operations.

A "UV/Vis Absorbance Microplate Reader" training was organized by IGUTEKMER, which conducts studies in the fields of basic science and engineering.

The UV/Vis Absorbance Microplate Reader device is used for cytotoxicity and kinetic enzyme studies, measurement of DNA and RNA quantities, protein and immunological measurements. It is widely used in research, drug discovery, biological assay validation, quality control, and production processes in the pharmaceutical and biotechnology industries as well as academic organizations.

The "UV/Vis Absorbance Microplate Reader" training, conducted by IGUTEKMER, was attended by the Health Sciences Faculty Vice Dean **Assoc. Prof. S. Arda Öztürkcan**, who is also a member of the IGUTEKMER Board of Directors and Executive Committee, and **Asst. Prof. Dr. Serap Yeşilkır Baydar**, the Coordinator of Istanbul Gelisim University Scientific Research Projects Coordination Unit. The training attracted great interest from academic staff working at IGUTEKMER and those planning to work in the center.
