GENERAL INFORMATIONS

FACULTY OF HEALTH SCIENCES

PREFACE

Prof. Rifat MUTUŞ

Dear young people;

One of every person's most fundamental rights is to be in a state of physical and emotional well-being. A health professional should be able to communicate with patients, exhibit a thoughtful and attentive attitude toward patients' needs, and be patient, tolerant, merciful, compassionate, and love people.

The Health Sciences departments all offer practical training. In their line of work, healthcare workers face an extensive variety of health issues. For this reason, the lab supplies and practical training programs in medical institutes are quite significant. Starting from this point on, our students utilize the thorough theoretical information they have received in our well-equipped laboratories to tackle health problems.

As the Faculty of Health Sciences at Istanbul Gelisim University, our goal is to produce graduates who value the protection of human health greatly, who are able to conduct research, who have made significant contributions to their fields, and who can change the world by offering top-notch instruction.

Our goal is to prepare well-equipped health professionals who are prepared for the profession before they graduate. In addition to the theoretical education that gives our students a strong foundation, we work with our distinguished academic staff at the national and international level in our international departments at the Faculty of Health Sciences.

With the hope of advancing the "development" process for protecting health together...

I wish you all have a productive and healthy academic career.

With love.

Prof. Rifat MUTUŞ
Dean of the Faculty of Health Sciences

ABOUT US

HISTORY

"Istanbul Gelisim University Faculty of Health Science" with the decision of the Council of Ministers numbered 2012/3620 dated 08.08.2012 which published in the Official Gazette No. 28407 dated 10.09.2012, started education as "Istanbul Gelisim University School of Health Sciences" in 2012-2013 Academic Year.

In the 2012-2013 Academic Year, students were enrolled in "the Departments of Nursing, Physiotherapy and Rehabilitation, Nutrition and Dietetics, Child Development, Social Work" to our School.

In the 2013-2014 Academic Year, six departments were formed in our school with the inclusion of "the Audiology Department".

In the 2014-2015 Academic Year, with the inclusion of "Health Management and Health Institutions Management * Departments", a total of eight departments have been formed in our School (* In 2015, with the decision of the Council of Higher Education (YÖK), these two departments were combined under the name of Health Management.)

In addition; with the inclusion of "English Departments for Nursing, Physiotherapy and Rehabilitation, Nutrition and Dietetics, Child Development, Social Work", which were firstly opened departments, our Faculty had a total of twelve departments, in the 2014-2015 Academic Year.

In the 2015-2016 Academic Year, "the Occupational Therapy Department" was added and our Faculty had thirteen departments in total.

In the 2017-2018 Academic Year, with the addition of "the Departments of Orthotics-Prosthetics and Perfusion", there were fifteen departments in our Faculty.

In the 2018-2019 Academic Year, with the addition of "Speech and Language Therapy and Gerontology Departments", our Faculty has reached seventeen departments.

On 15.02.2018, 13 departments have been fully accredited by the AHPGS (Accreditation Agency in the Area of Health and Social Sciences) Accreditation Agency. You can access related Accreditation information on AHPGS Web Page.

Our Faculty, which took its first step in the 2012-2013 Academic Year with 190 students, has continued with 3235 students in the 2019-2020 Fall Semester and 3274 students in the 2020-2021 Fall Semester.

"School of Health Sciences" was transformed into a "Faculty of Health Sciences" with the President's Decision No. 3203, published in the Official Gazette No. 31315 dated 25.11.2020.

ABOUT US

MISSION

Its mission is

To make its city, society and humanity more valuable,

To consider education, research and community service activities as its main duty,

To come together with the people who have merit and use resources effectively and accountably for a good, equitable and sustainable world,

To be an institution that believes in science ethics and freedom in its activities,

To be an institution that is dominated by an internalized culture of quality and tolerance,

To be an institution that develops itself physically, digitally, socially, culturally and psychologically.

VISION

“Being one of the WORLD UNIVERSITIES that create value on the path of continuous development”

IGU CORE VALUES

1-Commitment to Ataturk's Principles and the Basic Values of the Republic

2-Scientific Autonomy and Approach

3-Quality

4-Participatory Governance and Transparency

5-Continuous Improvement and Innovation

6-Human, Environment and Social Responsibility Awareness

7-Freedom of Thought and Expression

8-Institutional Culture

9-Encouraging Entrepreneurship, Team Spirit and Interdisciplinary Studies

10-Respect and Commitment to Universal Ethical Values

11-Environmentalism

12-Participation

13-Promoting Human Rights, Respecting Diversity and Being Sensitive to Equal Opportunity

HIGHLIGHTS

GENERAL INFORMATIONS

**DEPARTMENT OF FACULTY
OF HEALTH SCIENCES**

NUTRITION AND DIETETICS TURKISH

Number of Students: 364
Opening Year of the Department: 2013
Number of Internship Days: 30
Accreditation Status: AHPGS

Purpose of the Department

The aim of the Nutrition and Dietetics (English) Department is to contribute to the country by educating students in the fields of preserving, improving and enhancing the health of individuals and society throughout their lives, and increasing the quality of life by ensuring sufficient and balanced nutrition of individuals and society, in accordance with the national and international professional standards established based on evidence-based scientific principles related to nutrition and food, in the areas of maintaining health and improving diseases. Additionally, the department aims to develop nutrition policies and train qualified, high-level professional 'dietitians' with ethical values and expertise to ensure world-class operations in both public and private sectors.

Some Lessons:

- Sports Nutrition
- Quality Systems In Institutional Food Services
- Nutrigenetics
- Immune System And Immunonutrition

NUTRITION AND DIETETICS ENGLISH

Number of Students: 345
Opening Year of the Department: 2014
Number of Internship Days: 30
Accreditation Status: AHPGS

Purpose of the Department

-The aim of the Nutrition and Dietetics (English) Department is to contribute to the country by educating students in the fields of preserving, improving and enhancing the health of individuals and society throughout their lives, and increasing the quality of life by ensuring sufficient and balanced nutrition of individuals and society, in accordance with the national and international professional standards established based on evidence-based scientific principles related to nutrition and food, in the areas of maintaining health and improving diseases. Additionally, the department aims to develop nutrition policies and train qualified, high-level professional 'dietitians' with ethical values and expertise to ensure world-class operations in both public and private sectors.

Some Lessons:

- Sports Nutrition
- Quality Systems In Institutional Food Services
- Nutrigenetics
- Immune System And Immunonutrition

CHILD DEVELOPMENT TURKISH

Number of Students: 264
Opening Year of the Department: 2012
Number of Internship Days: 30
Accreditation Status: AHPGS

Purpose of the Department

Developmental screening/evaluation of the mental, language, motor, social, emotional development and self-care skills of children 0-18 years of age with normal development, special needs, protection needs, at risk and hospitalized, and supporting all development and skill areas, is to raise Child Developmentalists who provide services to families, educators and society.

Some Lessons:

- Developmental Evaluation And Monitoring
- Early Intervention Approaches And Developmental Risks
- Mental Health And Adjustment Problems
- Patient Child Development And Education

CHILD DEVELOPMENT ENGLISH

Number of Students: 115
Opening Year of the Department: 2014
Number of Internship Days: 30
Accreditation Status: AHPGS

Purpose of the Department

Developmental screening/evaluation of the mental, language, motor, social, emotional development and self-care skills of children 0-18 years of age with normal development, special needs, protection needs, at risk and hospitalized, and supporting all development and skill areas, is to raise Child Developmentalists who provide services to families, educators and society.

Some Lessons:

- Developmental Evaluation And Monitoring
- Game And Game Materials
- Mental Health And Adjustment Problems
- Child Health And Diseases

SPEECH AND LANGUAGE THERAPY

Number of Students: 297
Opening Year of the Department: 2018
Number of Internship Days: 30

Purpose of the Department

The main purpose of the Language and Speech Therapy undergraduate program is to train specialists who can use technological developments effectively, observing professional and ethical values in the field of prevention, identification, and rehabilitation of language, speech, voice, and swallowing disorders that begin in early childhood and extend into old age.

Some Lessons:

- Applied Behavior Analysis
- Swallowing Disorders
- Overview of Evidence-Based Practices in Speech and Language Therapy
- Basic Imaging and Analysis Methods in Speech and Language Therapy

OCCUPATIONAL THERAPY

Number of Students: 153
Opening Year of the Department: 2015
Number of Internship Days: 30
Accreditation Status: AHPGS

Purpose of the Department

The aim of the Department of Occupational Therapy is to train competent occupational therapists with scientific qualifications who can perform the necessary service applications to individuals, families and communities who have problems of participation in society in various dimensions. In line with this purpose, the department aims to provide the educational development of individuals who want to specialize in the field theoretically and practically and are sensitive to social problems.

Some Lessons:

- Therapeutic Activities in Occupational Therapy
- Art Approaches in Occupational Therapy
- Sensory Motor Cognitive
- Vocational and Community Based Rehabilitation

PHYSICAL THERAPY AND REHABILITATION TURKISH

Number of Students: 227
Opening Year of the Department: 2012
Number of Internship Days: 30
Accreditation Status: AHPGS

Purpose of the Department

Purpose of this department is to educate the graduates; who can determine the movement and functional disorders, who have skills with competence to apply preventive and therapeutic approaches, who take into consideration of benefits of community, who adopting the ethical principles, who can plan a multidisciplinary approach or compatible to teamwork, who can use information technologies or scientific research methods effectively, who can generate evidence-based practices, who adopting the principle of lifelong learning and who are striving for personal development.

Some Lessons:

- Manipulation and Mobilization Techniques
- Neurophysiological Approaches I-II
- Sports Physiotherapy and Rehabilitation
- Rehabilitation Technologies

PHYSICAL THERAPY AND REHABILITATION ENGLISH

Number of Students: 649

Opening Year of the Department: 2014

Number of Internship Days: 30

Accreditation Status: AHPGS

Purpose of the Department

Being able to identify movement and functional disorders in the field of physiotherapy and rehabilitation, have the necessary knowledge and skills to apply preventive and therapeutic approaches, consider the benefit of society, adopt ethical principles, plan teamwork with different professional groups or take part in the team, use information technologies or scientific research methods effectively. Our aim is to train graduates who can use them in an effective way, create evidence-based practices, adopt the principle of lifelong learning, and strive for their personal development.

Some Lessons:

- Basic Measurement And Assessment In Physiotherapy
- Electrotherapy I
- Principles Of Therapeutic Exercises
- Manipulation And Mobilization Techniques

NURSING TURKISH

Number of Students: 486
Opening Year of the Department: 2012
Number of Internship Days: 30
Accreditation Status: AHPGS

Purpose of the Department

Nursing (Turkish) Undergraduate Program aims to train nurses with the following characteristics; Having advanced knowledge and skills in the field, using nursing processes / models / theories in their practice, performing nursing roles, making the right decisions and taking responsibility in critical situations, analyzing and solving health care problems based on evidence, using professional autonomy, serving as a member of the healthcare team cooperating in the field and interdisciplinary, doing national and international studies, successful in employment and academic exams, taking part in all areas where health services are provided, protecting human dignity and privacy.

Some Lessons:

- Internal Medicine Nursing
- Surgical Diseases Nursing
- Mental Health and Diseases Nursing
- Women's Health and Diseases Nursing

NURSING ENGLISH

Number of Students: 415
Opening Year of the Department: 2014
Number of Internship Days: 30
Accreditation Status: AHPGS

Purpose of the Department

Nursing (English) Undergraduate Program aims to train nurses with the following characteristics; Having advanced knowledge and skills in the field, using nursing processes / models / theories in their practice, performing nursing roles, making the right decisions and taking responsibility in critical situations, analyzing and solving health care problems based on evidence, using professional autonomy, serving as a member of the healthcare team cooperating in the field and interdisciplinary, doing national and international studies, successful in employment and academic exams, taking part in all areas where health services are provided, protecting human dignity and privacy.

Some Lessons:

- Emergency Nursing
- Mental Health And Diseases Nursing
- Technologies Of Nursing Care
- Infectious Diseases Nursing

AUDIOLOGY

Number of Students: 169
Opening Year of the Department: 2013
Number of Internship Days: 30
Accreditation Status: AHPGS

Purpose of the Department

The Audiology undergraduate program seeks to give the public the finest service possible by providing students with access to high-quality information, clinical services, and research conditions.

Some Lessons:

- Instrumentation and Calibration
- Amplification and Assistive Device Applications
- Vestibular System Diseases and Assessment Methods
- Diagnostic Audiology I

PERFUSION

Number of Students: 148
Opening Year of the Department: 2017
Number of Internship Days: 30

Purpose of the Department

Through its undergraduate program, the Perfusion Department seeks to educate medical professionals who manage extracorporeal blood circulation using heart-lung machines under the guidance of pertinent specialist doctors performing interventions to the heart and/or major vessels.

Some Lessons:

- Perfusion in Congenital and Pediatric Patients
- Medical Terminology
- Hematology
- Cardiopulmonary Bypass Cannulation

HEALTHCARE MANAGEMENT

Number of Students: 114
Opening Year of the Department: 2014
Number of Internship Days: 30
Accreditation Status: AHPGS

Purpose of the Department

The aim of the Department of Healthcare Management is to train international healthcare managers who have the knowledge and skills to systematically and consciously apply the concepts and techniques related to the functions of planning, organization, execution, coordination and supervision for the realization of the goals of the health system, and through research to be carried out in the field of healthcare management, to contribute to scientific knowledge.

Some Lessons:

- Medical Terminology
- Health Tourism
- Health Institutions Management
- Strategic Management and Applications

SOCIAL WORK

Number of Students: 154
Opening Year of the Department: 2014
Number of Internship Days: 30
Accreditation Status: AHPGS

Purpose of the Department

The aim of the Social Work Department is to educate qualified social workers who can carry out the necessary services for individuals, families, and societies, who have social problems in various dimensions. The aim is to provide the educational development of individuals who want to specialize in the field theoretically and practically and who are sensitive to social problems. Those who graduate from the program are given the ARTICLE of "social worker". Social service demonstrates the power of social policies in the prevention and resolution of social problems while enhancing or improving their competencies for the social functioning of individuals, families, groups, and societies, and helping to improve social well-being and quality of life.

Some Lessons:

- Human Rights and Social Work
- Social Issues
- Human Behavior and Social Environment I
- Social Policy and Planning

Ayşe POLAT

Physical Therapy and Rehabilitation (ENG)

Hello, I am Physiotherapist Ayşe Polat.

I am a graduate of Istanbul Gelisim University (2021-2022 Academic Year), Physical Therapy and Rehabilitation English Program. Our school has always provided us with the best education with its teaching staff and structural facilities. We had well-planned and applied training in individual, student-specific and groups about the internship and thesis periods. Among my experiences at our school, I can describe my greatest experience as follows; I wanted to do internships in many different fields during the internship period; I informed my teachers that I wanted to create separate internship periods in the field of sports, state hospitals and clinics. I have done internships in many places and our teachers have prepared the planning and settled my internship period on a schedule. During this difficult process, my teachers helped me to go through this process comfortably and to do internships in important places in a programmed way. I would like to state that I had a university life which was qualified in terms of support and education. As IGU students, I can tell you that we had a lucky time in our university life and I would like to thank all my professors.

Kübra Nur YILMAZ

Nursing (ENG)

"In 2019, I won Nursing (Eng) at Istanbul Gelisim University with DGS. Nursing has been my dream since I was a kid. Being able to touch people's lives, helping them and making them smile as a result was the biggest factor in choosing this profession for me. The caring attitude of our school and our valuable lecturers also increased my interest and love for the profession. Thanks to the opportunities provided by our university, we had the opportunity to do our internships in various hospitals. The fact that my department is in English has given me the opportunity to work in international fields. After graduating and starting my business life, thanks to the information given by my lecturers, I had the opportunity to start my profession with knowledge and skills. I would like to express my gratitude to the head of the Nursing Department and my valuable lecturers who made these contributions to me."

ALUMNI

Fatma GÜLTEKİN Nutrition and Dietetics (TR)

Before I started university, I never thought that an institution would affect my life so much. The years I spent at Istanbul Gelisim University were instrumental in finding the purpose of my life, which has a very important place in our lives, and getting to know myself both professionally and personally. I started university with the Department of Nutrition and Dietetics, and now I have the diploma of 2 departments with the opportunity of the Double Major program provided by my school. This situation is actually much more than 2 diplomas... It means more experience, the opportunity to work with more professional teachers and the chance to get to know oneself more. Again, with the Erasmus program provided by my university, I had the chance to go to countries that I could not even dream of and do internship abroad without financial support from my family. It was an experience I will never forget in my life. Universities are not only a place where professional development peaks, but also a very good environment for people to socialize. The best thing I liked about my university was that it provided this environment very well. I can say that meeting the Lösev club at my school in the first year of my undergraduate life was a turning point in my life. Getting to know people from different departments, meeting our advisors on a common ground, and being able to touch someone's life with the valuable support of our school is really valuable. I would like to express my gratitude to all my department teachers who have never given their support to us during this process, who have worked hard to make us a good dietitian and a good chef both academically and individually, the Career Center and Erasmus Coordinatorship that have contributed to our individual development. Glad I'm from Gelisim!

Eda Nur BAYRAK Child Development (ENG)

"More than just being a student of a school, Istanbul Gelisim University became a turning point in my life by giving me an identity. First of all, my department is Child Development and thanks to all my teachers who do not spare their efforts and knowledge, I had an experience that I never expected during my 5-year undergraduate education, including the English Preparatory Class. I gained the practical reflex and technical knowledge that could not be learned during the internship. It added color to my life with the social opportunities offered in this process. The doors of our instructors that never close and the educational opportunities that are laid out in front of the students helped us to take our horizons one step further. I am still in my department thanks to the opportunities provided by Istanbul Gelisim University. I continue my education as a senior student in the Department of Social Work. I am proud to be a graduate of my school, which has created an environment where science principles are internalized for these opportunities it provides to me and our university students".

ALUMNI

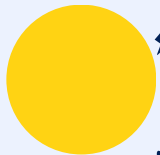

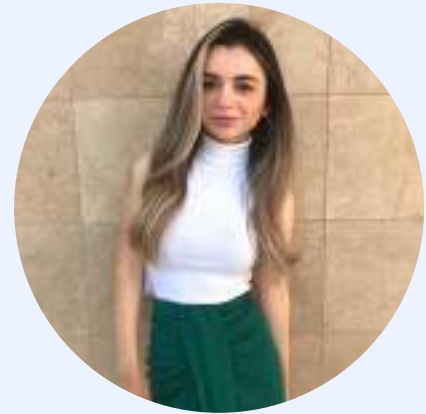

Buse DEMİRKILIÇ Nutrition and Dietetics (ENG)

Istanbul Gelisim University was not just a university for me; it provided me with good friendships, colleagues, and valuable academic experiences. With the guidance of expert teachers, we made presentations, practiced skills, and participated in various activities during lessons. I especially cannot forget the practical exams of the Food Microbiology course. The excitement and nervousness we experienced during those exams have remained as very good memories. Nutrition and Dietetics is a very important field for me. I appreciate that our teachers encouraged us to be the best and provided us with appropriate training. Through presentations, they prepared us even better for the profession by giving us constructive criticism on our classroom demeanor, diction, and slide presentations. One of my most unforgettable memories was writing a diet plan for diseases and discussing what we wrote together. After preparing various foods with our instructors in the Nutrition and Dietetics kitchen laboratory, it was quite enjoyable to taste and evaluate them with our friends. To summarize my five years at Istanbul Gelisim University in one sentence: it was both a fun and educational experience. I would like to express my gratitude to my teachers and friends who have always supported me endlessly.

Başak KÖROĞLU Nutrition and Dietetics (ENG)

During my years as a student at Istanbul Gelisim University between 2016-2022, I would like to express my deep gratitude to my wonderful teachers and all academic staff for their contributions to my professional experience. Although studying in the Nutrition and Dietetics department, especially in English, is multifaceted and tiring at times, our research assistant and department teachers have always made it easier for me. Their support has helped me to overcome even the most challenging periods positively. The diverse international programs and accreditation opportunities at my university have been a great source of motivation for us. I am thrilled to have come across such exceptional people, and I will always do my best to support them after graduation. Thank you for everything, always.

ALUMNI

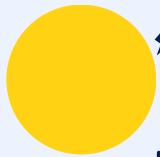

Aleyna AŞIK Nutrition and Dietetics (TR)

I think my adventure of starting Istanbul Gelişim University was a little different from other students. I saw my school for the first time when I was going to university exam. Afterwards, I added IGU to my preferences, knowing that the entire campus was in the same district. The most important part for me at that time was that the entire campus was in the same district. My friends that I saw around me were very tired of commuting and the time spent in traffic. I was lucky because my entire campus was in the same place. When school started, I realized that my luck didn't just end there. If the grade point average at Istanbul Gelişim University was within a certain range, the Double Major opportunity was free of charge. In addition, 63 more departments had international accreditation together with my department, the Department of Nutrition and Dietetics. Our laboratory classes started from the first year of the university. All of our laboratories were modern and fully awaited for our lessons. I was satisfied with the academic staff of my department. Our lessons were full of knowledge and experience. I always felt lucky when talking to my friends who studied the same department at different universities because the education we received made a difference. I've seen this even in my internships. The dietitian with whom I was an intern during the summer internship of my second year was surprised at the information I knew, the methods I used, and the fact that I knew them from the second grade. I would like to thank all my Nutrition and Dietetics Department teachers who have always graduated us with ethical, reliable, self-confident, professional knowledge and skills in their profession. I will never forget that you never took your hands off us, even after graduation. Glad I was your student. Finally, I can't help but say that I am unfortunately one of those who spent 1.5 years of university life with online education due to the pandemic. Even in this difficult process, our lessons did not fail for a day. As soon as online education was mentioned, our courses were loaded into our ALMS system without any problems. Even with online education, our teachers solved a lot of cases with us. I will never forget that my school did not make me suffer. I would like to welcome my friends who will come to Istanbul Gelişim University in advance. I have never been absent, now I have to be written absent, you fill the lines for me. I wish you a very happy educational life. Love...

Buse Nur GEZMİŞOĞLU Child Development (ENG)

"I had fears when I chose Istanbul Gelişim University Child Development English department, but then my life was spent saying "good luck" all the time. While studying my department, I learned that if we want something that school is not just studying, we have to make an effort for it. I have participated in many projects and activities (I continue to be involved). And at the end of each project, I said I am glad I chose this profession. It is certain that I will not get enough of this profession. A section where I will share my joy, excitement and knowledge. My wish is to be able to guide our children throughout their lives, to help our parents and to raise awareness of them. I hope everyone who studies Child Development at Istanbul Gelişim University experiences these feelings".

ALUMNI

Ezgi PİŞKİN

Nutrition and Dietetics (ENG)

The time I spent at Istanbul Gelisim University has contributed significantly to both my professional and personal growth. The support we received from experts in their fields, both inside and outside the classroom, demonstrated that despite the complexity of human nutrition, it can be taught effectively by knowledgeable professionals. We were instilled with the awareness of how valuable our education was for our personal development and the society we live in, as we delved into the study of human health. Only after leaving the university, did I fully appreciate the benefits of graduating from an internationally accredited department. The education provided at Istanbul Gelisim University adheres to international quality standards, and the university's dynamic and youthful energy continues to flourish. In summary, Istanbul Gelisim University is an institution that not only contributes to your professional growth but also fosters personal development.

Dilara Buse KARADAĞ

Nutrition and Dietetics (ENG)

When I reflect on my past, I can confidently say that my university life was enjoyable in every aspect, and it contributed significantly to my personal and professional development. The theoretical and practical knowledge I gained from our esteemed professors not only helped me during my internships and business life but also in my personal life. The university's comprehensive support, the experience and approach of our professors, and the activities of our clubs all played a crucial role in my growth. One of the most significant opportunities provided by our department during my undergraduate education was international accreditation, which would enable me to practice my profession abroad without encountering many procedural obstacles. Therefore, I am proud to have chosen Istanbul Gelisim University...

ALUMNI

Yaren ARAS Nursing (TR)

I graduated from the Turkish Department of Nursing at Istanbul Gelişim University a year ago. I have never had any doubts about our teachers and educational information. It has been 4 years that I have never regretted. The approach of our teachers to us as both educators and members of our family has always continued. Despite our graduation, we still have many teachers who continue to answer all of our questions. As a double major opportunity at the same school, I am studying nutrition and dietetics for free. While many universities do not offer this opportunity, my own school has always offered us many opportunities in our education issues. After graduation, we were actually trained to be active in the field in many areas in our own professions and I have never regretted choosing this school, I am glad I did....

İhsan OYANIK Nursing (TR)

I won the department of nursing at Istanbul Gelişim University with a vertical transfer exam. Since I know its advantage in international accreditation, I chose the development university. I received a very good education with its successful academic staff at the university that I dreamed of. My teachers are also very interested outside of the classroom and internships have always supported me, both at school and after graduation, on how to progress in my field as well as professional skills. After graduating in 2022, I got a job in one of Turkey's leading health institutions in the field of health. I would like to thank the professors of Istanbul Gelişim University for their quality education and support. I have always seen the advantage of studying at Istanbul Gelişim University both during and after school.

ALUMNI

Adem YÜMSEL

Perfusion

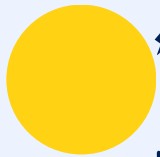

One of the defining moments in my life has been joining the Istanbul Gelişim University family. Because education is about more than just imparting knowledge; it's also about fostering moral character, making friends, and building self-confidence. The process of becoming a perfusionist is extremely demanding, tiring, and self-assured. One of the crucial and unsung heroes of cardiovascular surgery, perfusionists must acquire both practical tools and intellectual growth during training. Thanks to its knowledgeable professors and practical training tools, the Istanbul Gelişim University family has provided training that has adequately equipped us for the commercial world. The main factor in my adoring adjustment to this department, which I was unfamiliar with before I started, during my undergraduate studies has been our esteemed and kind lecturers. Many of my friends, including myself, are no longer strangers when they are working in the field because of the conferences that our university hosts and the events where we may meet our experienced colleagues. Being "Developed" is a luxury and an honor in part because of these factors.

Beyza Nur GEDİKPINAR

Nutrition and Dietetics (TR)

Istanbul Gelişim University has added a lot to me about my life and my professional life. University years full of good memories, friendships, professional knowledge and experience, opportunity for self-discovery and many more. I would like to thank my teachers, who supported us during these beautiful years of education, treated us with family affection when necessary, and prepared us for life. Although each department is a separate world in itself, the Department of Nutrition and Dietetics requires a high effort and determination, together with its professional education and the responsibility of touching human life. As a part of the health sector, raising people's living conditions and taking on a role in preventive medicine against diseases is invaluable. In addition, as someone who has benefited from the opportunities offered by the school such as the Double Major Program and the Erasmus Program, I can say that these opportunities are very valuable. It is a privilege to be a part of Gelişim, both with their contributions and support.

ALUMNI

Elif ALTAŞ Child Development (TR)

Hello IGU Family;
I met you through Vertical Transfer Exam. We have been closely acquainted with the child development branch since 2012. This field is the greatest gift for me to reflect the enthusiasm, determination, patience, innocence, perseverance, and most of all, love that I experience inside. Children are such beings that; The meaning of this life is the most innocent creatures that give flavor to the world, which starts with their smiles and progresses with their skills, developing with their thoughts. These ideas have been the leading role of my feelings, which I have not only read about children, but also come down to their field, travel and see their world, taste their culture and lifestyle, and experience with the most sincere feelings I have learned. The child is today, the child will come tomorrow. If it is the future, it is the most precious power that keeps us alive. It is to blend love and knowledge with all my strength and to be the way and companion in their lives.
I would like to thank all my teachers who taught me and taught me here.

Stay with your inner child, dear IGU Family
love..

Dilara Cansu BULUCU Child Development (TR)

First of all, I feel very lucky to be studying in an ever-evolving school. It is very nice that our department professors take care of us individually, even though they have more than one student. They are very sincere towards us and are always there for us in both class and individual problems. For this I am grateful to each and every one of them. As for why I chose this section, I was wondering about a child's imagination, what they perceive in a movement we make, how they develop as they grow up, of course, underlying this is the great love I have for children. When I start my profession, I will try very hard to realize that each child is special. Every child is special and every child needs protection. I think that we have a great impact on the formation of healthy individuals in the future. One person affects ten people, ten people and a hundred people, so awareness begins. I am very happy and proud to have graduated from this university with this title.

ALUMNI

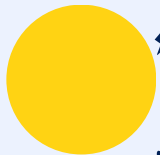

Serkan Çağlar GÜNAKIN Occupational Therapy

I studied Occupational Therapy at Istanbul Gelişim University. I had unforgettable experiences during my student years. My first trip to Ankara, my first visit to Çanakkale, my first conference, my first presentation. Apart from the social areas, the accreditation of my department, the fact that our library is full of books that we cannot find elsewhere in Turkey, and thanks to the richest laboratory conditions, it has provided me with the competence to open my own place in my first year by graduating professionally, thanks to IGU

M. Emre ŞANLAN Physical Therapy and Rehabilitation (TR)

During the Physiotherapy and Rehabilitation undergraduate education I received at Istanbul Gelişim University, I became equipped in my profession with practical applications as well as theoretical knowledge. During our education and training, we had the opportunity to get to know and use various devices related to our profession. I also had the opportunity to do internships in various hospitals. During these internships, I saw how effective the quality information and experiences I received from our teachers were. Thanks to the detailed knowledge of our teachers, I gained the self-confidence to do my job while I was graduating. I realized these advantages when I started my working life. I was able to successfully apply my profession and received positive feedback. When I look back, I say I made the right choice. I would like to thank the entire Istanbul Gelişim University family for their unwavering support.

ALUMNI

Özgü AKÇAP Audiology

First of all, it was my greatest privilege to study at a unique university like Istanbul Gelişim University, which was the best four years of my life. I would like to thank my university, which always paves the way for students who are active, who are not content with less, who always want more, and who always walk side by side with us in innovation, development, and production.

The field of audiology is one that is open to development and innovation. I have always made new developments with my university and my invaluable professors, both when I was just a student in club management and when I was managing the club presidency.

We organized very nice conferences and congresses together. Taking part in the first international congress of our university and working tirelessly day and night with my professors and dear friends are the best memories for me.

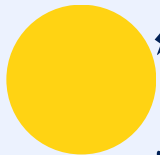

Thanks to my university and my esteemed professors, I immediately gave up the fear that I would experience the disadvantage of being a student in a new department during my university years. We have lived through the effort of learning how to teach more by not falling behind in any subject in theoretical and practical courses. Now, continuing my admiration for my university, I continue my master's degree at my own university. With gratitude to all of my professors and my university

Damla TÜRKER Audiology

My four-year education period at Istanbul Gelişim University was a turning point in my life. Throughout my education process, not only in the profession but also in every point of life, by presenting us with sections of their lives, telling us how we can cope with the difficulties they have overcome, guiding us in all matters, leading us to success step by step, not withholding the slightest financial and moral help on this path, and keeping us firmly on the ground. I would like to thank my esteemed professors who trained them as confident individuals and sent them off from the faculty.

As someone who studies at the audiology department with fondness and willingness, I can say that, of course, like every department, ours has its own difficulties. When you first start the episode, you can sometimes find yourself tired and sometimes hopeless, but when you think about the end and imagine what lives you will touch and how, all negative thoughts disappear like a dust cloud. If you learn the information given during the education process not by memorizing the topics but by understanding, repeating, participating in, and reinforcing the applied lessons, let the lessons fear you. Istanbul Gelişim University, where you will feel safe while all these are going on, will be a great chance for your development and progress.

ALUMNI

Meryem Canan ÇELİK Healthcare Management

“Hello, I am Meryem Canan ÇELİK, a graduate of Istanbul Gelişim University, Faculty of Health Sciences, 2022 Healthcare Management Department. University years are a turning point that every student should spend productively in his life. During my education, I considered my institution not only as a school but as a personal development point, and I had the opportunity to discover myself in many areas. On the way to become both a healthcare professional and a manager, I had the opportunity to meet experts in their fields as fully equipped individuals with the seminars, congresses and organizations provided by our school. Our department has been deemed suitable for accreditation by accreditation bodies such as AQAS, ABET, AHPGS, PEARSON and our education level has always been kept at the international level. I am proud to continue my career journey and add value in my school, which has always supported me. Thanks to the vision and perspective I have taken, I would like to thank my esteemed teachers for always looking ahead with a brighter and more hopeful outlook.”

İlker Mete UYSAL Healthcare Management

“In those days when I spent the most productive years of my education life, I received very useful guidance from my department teachers about my career planning after graduation. My esteemed professors, who have already met the academic education processes in the best way, have also provided enlightening guidance on my path, which has made serious improvements in my life. I still keep in touch with the sector representatives that I met through my professors during my club presidency. Therefore, this allowed me to master the industry requirements and 21st century competencies while I was still a student. In addition to all these, by joining the accreditation board of my department, I personally experienced that world-class competence and competence concepts are met and deserved in many departments of my university in particular. On the other hand, I am not staying at the undergraduate level, but I am continuing my master's degree in Health Management with the privilege of Istanbul Gelişim University. Currently, there is an Istanbul Gelişim University Healthcare Management department that shines like a star on my resume, which is one of the experiences that always made me happy in terms of my personal development and professional competence process and made me say "good luck" when I look back. I would always like to thank my esteemed professors and faculty administrators who have been instrumental in my thinking about these issues.”

ALUMNI

Aslıhan Kübra SAKARYA ATAY Social Work

"Istanbul Gelisim University is a truly dynamic and constantly evolving university, in line with its name. I make this conclusion based on my five years of university education, which allowed me to amass a great deal of experience, and the high-caliber guidance provided by our professors that enabled us to accumulate a wealth of intellectual knowledge. I am filled with admiration for the progress that we have made under their mentorship. As someone who cannot detach myself from this dynamism, it is both exciting and prideful for me to continue being a part of this family as a research assistant at the university where I graduated from and continue to produce together."

Hatice AYHAN Social Work

"My years at Istanbul Gelisim University were a turning point in my life. During this period, I was able to take myself to the highest level by acquiring the most valuable knowledge related to my profession through opportunities such as seminars, congresses, and many other events offered by my university. In my first year, I took advantage of the opportunities and became a member of the Social Work Student Club, eventually reaching the position of club president and enjoying the pleasure of planning congresses with the most qualified professors in the department. By organizing seminars and establishing connections with new people, I had the opportunity to develop myself in many areas and extend my network. Additionally, thanks to another opportunity offered by my university during my university years, I was able to pursue a minor in psychology."

The Social Work department is a lifesaver, and sometimes you face very difficult cases. However, all you can think of is how to solve the case and how to bring the individual back to life. Because we do our best to bring even disadvantaged individuals back to life to help a society prosper, and in doing so, we can touch lives and become heroes. My love and respect for my department have increased significantly along with the education provided by the esteemed professors at my university, which helped me become an expert in my field. If there is a university that deserves its reputation for quality education with full scholarship opportunities, it is Istanbul Gelisim University."

ALUMNI

Büşra SAYİR

Physical Therapy and Rehabilitation (TR)

"Istanbul Gelişim University touched my life first on this path I set out to touch people's lives and made me a good person who can see and making decisions accurately and clearly and evaluate the past, present and future in a wide framework before being a physiotherapist. I can say that my university has become my second home with the sincere and reliable environment created by my professors, who convey their knowledge unlimitedly, teach many things about life as well as vocational education, and raise them as individuals who have their feet. The Physiotherapy and Rehabilitation department has a wide spectrum, encourages learning and discovery as you get into it, and it is a pleasant section to read with a sweet tiredness. I think that the happiness of being able to help people everywhere at any time is worth this tiredness. It is essential that you study hard in your classes and add your night to your day. However, while you are doing all these, it is a great chance for your school to strive for your development. Undergraduate education not only offers courses in the curriculum, but also offers many opportunities to students with international congresses, symposiums and seminars, where they can closely follow the technological developments in health. At the same time, these opportunities create a wide communication network for us. My university always supports successful students, provides double major and postgraduate scholarship opportunities, and as someone who has benefited from these, I think that Istanbul Gelişim University is a good education and training place for a student. My department offered us the opportunity for international accreditation. As a result of quality assurance audits, as of spring 2018, a total of 63 programs of Istanbul Gelişim University were examined in detail by international expert committees appointed by organizations such as AQAS, AHPGS, PEARSON, ABET and were found suitable for accreditation. I think the university that deserves its name the most is Istanbul Gelişim University."

Muhammed Ubeyde HAKKI

Physical Therapy and Rehabilitation (ENG)

Universities build foundation stones for generations of scientists, doctors, engineers, and scholars to come. With four years of providing continuous development in the department I chose to study in, Istanbul Gelişim University was the place where I chose to take the first step in building the foundation of my profession as a physiotherapist. No doubt the quality of learning provided was one of the best, given the constant efforts of the university to attract the best teaching staff from different parts of the world. Every lecturer was chosen with care to be the one suitable for his/her subject, teaching it with passion and professionalism. Given my department was an English-taught one, all of my lecturers were professional English speakers, with some even carrying degrees from English speaking countries like the UK or the USA! We all know graduating from a university without passing through compulsory internships isn't possible, but finding a place for your internship may be a little bit challenging. Despite not having its own hospital during my years of study, Istanbul Gelişim University managed to help all students find hospitals and clinics to carry out both their compulsory and voluntarily internships. Thanks to their abundant quotas in contracted public hospitals, I was personally able to get my first internship experience by only signing my name up for the quota. Due to the school's several international accreditations and affiliations, particularly with the Erasmus+ mobility program, I was able to travel, discover, and learn in a different country for a whole semester. This experience alone helped me widen my horizons and develop abilities like adapting as a foreigner in a new country, communicating with people from different cultures who speak different languages, and overcoming different forms of hardships. Istanbul Gelişim University will always have a special place in my heart as the first terminal in my advanced academic life.
