HEALTHCARE MANAGEMENT IN TURKEY

1963

The health management school education program in Türkiye was established in 1963 under the name of the School of Health Administration under the Ministry of Health and Social Assistance.

1970

Within the scope of the Health Management training program, postgraduate education was given at the School of Hospital Administration at Hacettepe University between 1970 and 1975.

1975

The first Health Management undergraduate program was opened

2016

At the meeting of the Council of Higher Education (YÖK) Presidency, Higher Education Executive Board dated 16.11.2016, it was decided to change the names of all departments providing health institution management training under different names within different faculties to "Health Management".

HEALTHCARE MANAGEMENT AT

2014- 2015

Department of Health Management was opened under the roof of the School of Health Sciences in the 2014-2015 academic year.

2017- 2018

Istanbul Gelişim University's Department of Health Management, which was accredited by AHPGS in the 2017-2018 academic year, provides education with a curriculum that complies with universal standards.

2020

With the Presidential Decree No. 3203 published in the Official Gazette No. 31315 dated 25.11.2020, the "School of Health Sciences" was transformed into the "Faculty of Health Sciences".

As the Department of Health Management, we are privileged to be a department that embraces all students who aim to achieve the expected and necessary development in health services and become qualified health managers. Here, our students learn new and effective approaches to managing the complex structure of health institutions, sharing the resources allocated to health in the most optimal way, and developing policies for the continuous improvement of health.

In the Department of Health Management, where both health and management are discussed together, our students gain not only theoretical gains but also practical gains with the application courses they take, thus gaining professional experience before they graduate. In order to direct our students to continuous progress and development on their path towards their careers, we host important names from the field and offer our students the opportunity to see closely the areas they will specialize in the future through institution visits.

PURPOSE OF THE DEPARTMENT

The main purpose of the Department of Health Management is to contribute to the development of the health sector by training professionals who are qualified to manage and lead health institutions and who will do their job with faith and love.

FUTURE OF THE DEPARTMENT

The Department of Health Management has become important with the need for professionalization of management in health services. The fact that health systems are quite complex structures where many professional groups work together and that the largest share in a country's economy is allocated to health has made the existence of expert health managers necessary in managing health institutions and developing health policies.

PROGRAM AND CURRICULUM INFORMATION

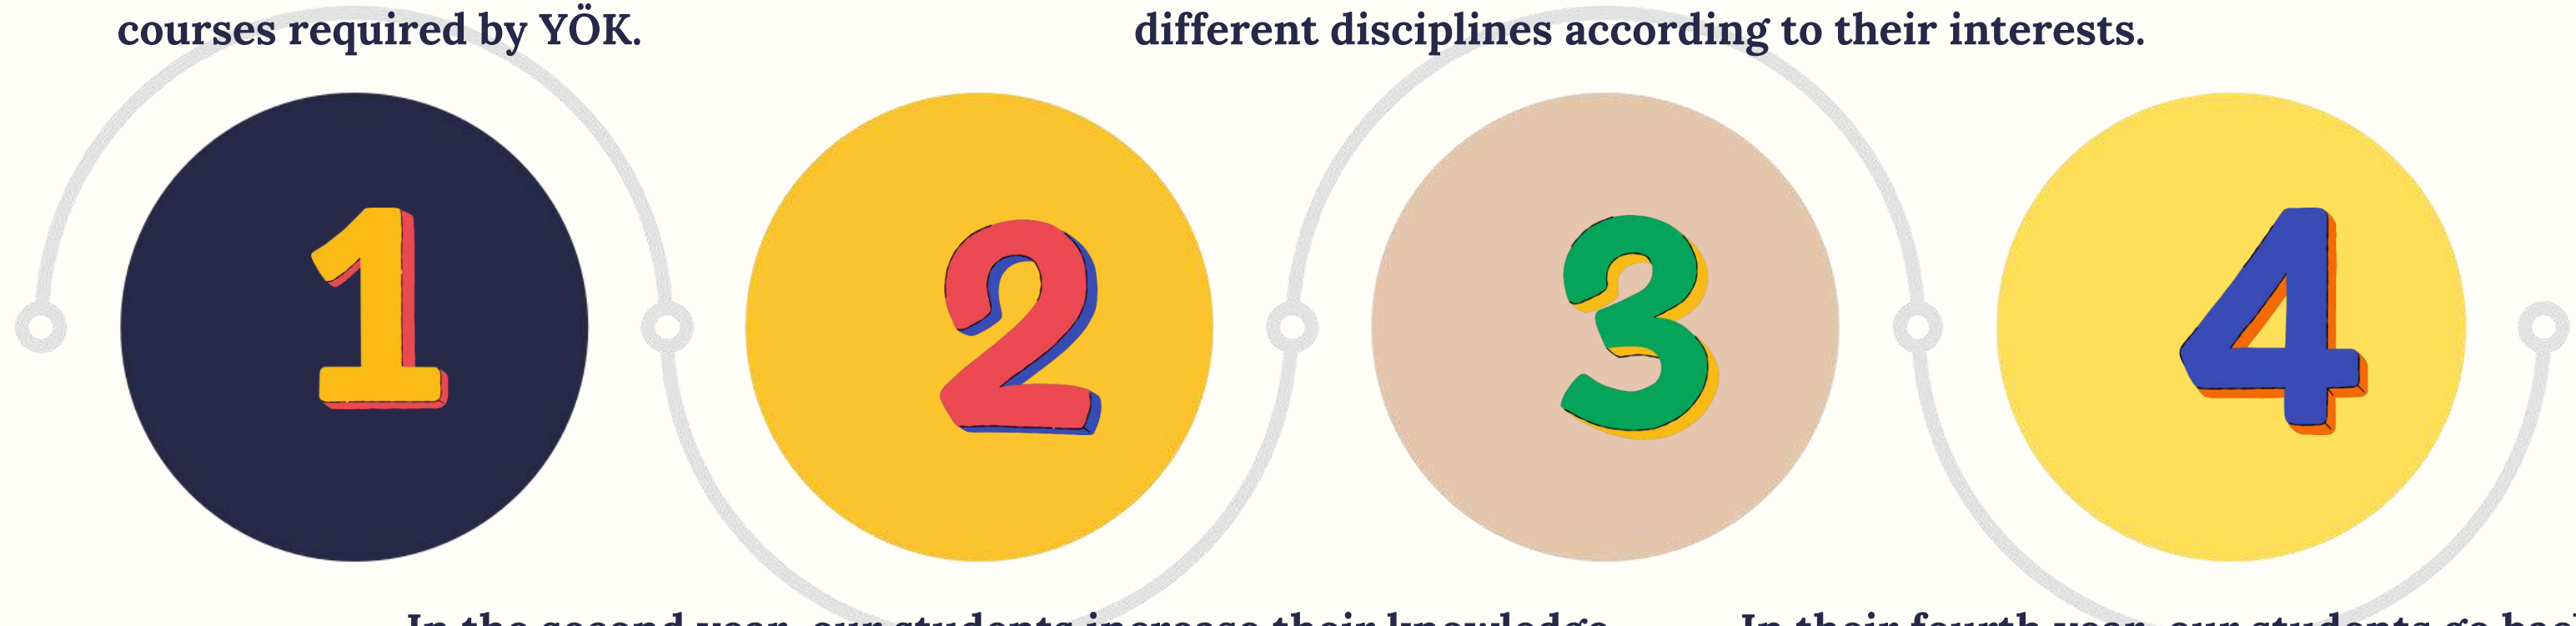

In order to graduate from Istanbul Gelisim University, Faculty of Health Sciences, Department of Health Management, it is necessary to complete a total course load of 146 credits and 240 ECTS.

The Department of Health Management provides education with a curriculum that complies with the **national core education program (SAYÇEP)** and **universal standards**. The curriculum of the Department of Health Management includes 48 courses, both theoretical and applied, 38 of which are compulsory and 10 of which are elective.

“
Thanks to the
education provided in
accordance with
universal standards,
our students who
want to work abroad
are always one step
ahead.

PROGRAM AND CURRICULUM INFORMATION

In the first year, our students experience their first contact with the field courses in which they will be introduced to the Health Management department, as well as the courses required by YÖK.

In their third year, our students begin to take courses in which they can gain knowledge in more specific areas on top of what they have learned in the first two years. In addition, students can take non-departmental elective courses and courses from the elective pool within the university, and they can touch different disciplines according to their interests.

In the second year, our students increase their knowledge with courses such as Health Institutions Management, Hospital Management and Organization, and can focus on their areas of interest with departmental elective courses. At the end of the second semester, they have their first professional experience with the Summer Internship.

In their fourth year, our students go back to the field with Field Study courses and, having decided on the field in which they will specialize, produce an academic output with what they have learned over the course of 4 years, together with the Graduation Thesis course.

LEARNING OUTCOMES

- Have theoretical and practical knowledge about economy, business, accounting, law, finance, finance and management science, sufficient to understand, evaluate and direct the functioning of the health system.
- Gains knowledge about interpreting the components of national and international health systems and health policies.
- Recognizes the subdivisions of the health system organization and the employees in these departments, and has information about the duties, powers and responsibilities of the employees.
- Gain knowledge about social, environmental and behavioral factors related to improving public and individual health.
- Has the knowledge to access scientific knowledge in the field of Health Management, monitor, evaluate and apply current literature.
- He/she will use his/her knowledge and skills in healthcare institutions management, management, production, human resources, finance, accounting, marketing, patient and public relations, quality and patient safety, occupational health and safety, information technologies, health insurance, etc. applies in the fields.
- Applies scientific methods and techniques in critical and creative thinking, decision making and problem solving in problems that arise during the management of health institutions

create their own
curriculum with elective
courses outside the
department and gain
different perspectives with
innovative courses.***

”

-  The Art of Communication: Communication as a Life Skill
-  Understanding Human Needs: Production, Distribution and Consumption in the Digital Age
-  Artificial Intelligence and Behavior
-  Ways to Achieve Economic Success: Sustainable Innovation
-  Communication Network and Art in Management

ERASMUS+ PROGRAMME

Department of Health Management cooperates with external stakeholders within the scope of internship mobility.

Erasmus internship mobility is the process of a student registered at a higher education institution receiving vocational training and/or gaining work experience in a business or organization abroad.

With Erasmus internship mobility, our students can gain practical work experience in the field of health management in a European country.

“

*If you want to serve
humanity, take part
in the healthcare
system.*

TAKING STRONG STEPS INTO THE FUTURE: OUR GRADUATES

Gökçe ÖZTÜRK

Graduate of Department of
Healthcare Management

Hello, I am Gökçe Öztürk, one of the 2023 Healthcare Management Graduates of Istanbul Gelişim University. The biggest advantages of studying this department at Istanbul Gelişim University were the academic staff of the HealthcareManagement department and the internship opportunities it offered. Thanks to both the theoretical and field knowledge support our school provided for us during our education process, we started our working lives much more equipped and ready. I would like to express my gratitude to both our University and our valuable educators for always shedding light on my life and supporting us in every aspect.

İsmail TÖBE

Graduate of Department of
Healthcare Management

I am a 2023 HealthcareManagement graduate from Istanbul Gelişim University. Since I received nursing education in high school, I have been working as a nurse in the public sector since 2014. I see that the management and communication skills provided to me by the HealthcareManagement department have a great contribution to my working life. Many courses I took in the Department of Healthcare Management were very useful in the field and contributed to my career development. I am grateful to our department faculty members.

TAKING STRONG STEPS INTO THE FUTURE: OUR GRADUATES

Hüseyin YAZICI

Graduate of Department of
Healthcare Management

Department of HealthcareManagement is a multidisciplinary department, and graduates of the department can work in many health institutions, including hospitals, health insurance companies, laboratory centers, pharmaceutical companies, information systems and technology processes, and health tourism. Since a professional management approach is a necessity for the health sector, healthcaremanagement graduates are needed in many health institutions. Istanbul Gelişim University Healthcare Management department makes a difference with both its academic quality and club activities. Istanbul Gelişim University Department of Healthcare Management provides career planning and support to students by building a bridge between the sector and academia with its activities and multidisciplinary curriculum.

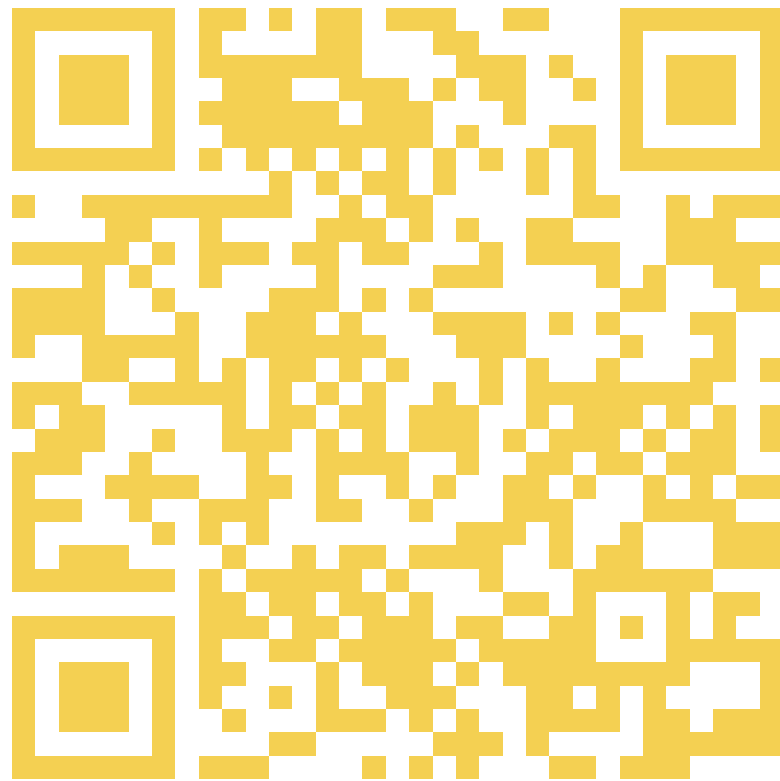

İlker Mete UYSAL

Graduate of Department of
Healthcare Management

IGU Department of HealthcareManagement is a department full of competent human resources that supports its students and graduates both administratively and academically. Throughout my undergraduate and graduate education, I always felt the support of my esteemed department and faculty administrators, who devoted their valuable time to many guiding meetings regarding both department activities and my career goals. I would like to thank all my teachers who contributed to me reaching where I am.
