

IGU PREFERENCE AND PROMOTION DAYS HAVE STARTED!

Istanbul gelisim university preference and promotion days started as of July 16. University candidate students who visit Igu will be able to learn about the departments and make their university preferences together with experts in their preference processes.

With the announcement of the YKS (Council of Higher Education Exam) results, university candidate students started to research the universities and departments they would prefer. While Istanbul Gelisim University (IGU) offers scholarship opportunities to students who participate in the preference and promotion days starting as of July 16, students will be able to come to Igu and get information from expert advisors and academicians about the departments they dream of and find answers to all their questions.

"We offer world-class training and application opportunities"

Stating that Istanbul Gelisim University is the 1st in Turkey with its 45 TQF (Turkish Qualifications Framework) logo graduation certificate and 65 accredited programs that facilitate education, internship and employment in the international arena, Igu Rector Prof. Dr. Bahri Şahin said, "We offer our students world-class education and application opportunities so that they can realize their dreams without drawing boundaries. Our graduates stand out in their international job applications thanks to accredited programs and diplomas with the TQF logo. With the importance we attach to science and innovation, we support the projects of our students, who are the architects of our future. We see our achievements in international rankings as an indication of the steps we have taken for sustainable and qualified education and we always strive to achieve more for continuous development."

AN ARTIFICIAL INTELLIGENCE PROJECT THAT GIVES HUMAN IMPRESSION HAS BEEN DEVELOPED AT IGU!

Today, many of us get help from the internet, known as the communication network, which is one of the effective solutions to access information. Lect. Bilge Turp Gölbaşı said, "Although there are multiple answers to access information on the internet, we can reach what we are looking for from different websites and with answers in text form."

Under the supervision of Istanbul Gelisim University (IGU) Faculty of Applied Sciences, Department of Management Information Systems Lect. Bilge Turp Gölbaşı, an artificial intelligence project was developed by IGU students Burak Tekin,

Oğuzhan Bulut and Merve Oner. Asst. Prof. Dr. Bilge Turp Gölbaşı, "Although it is possible to voice the answers of the applications or sites we found as long as the site or application supports it, there are different types of solutions with interactive and visual animation. In order to serve this purpose, we have developed an interactive artificial intelligence solution with a visualized interface with our university students."

"In the simulation, we used a speaker who gave the impression of an audible and visually vivid person"

Explaining how the project development process is progressing, Asst. Prof. Dr. Bilge Turp Gölbaşı added: "The interactive artificial intelligence (AI) simulation, which is planned as a student project at Istanbul Gelisim University, aims to provide the most logical and correct answers to the questions asked by users with software language integration. By adding voice command detection feature to the simulation, we enabled users to present the correct answers aloud. The simulation responds with a human voice to understand the needs and give the most appropriate solutions to these needs. Thanks to artificial intelligence algorithms, the system generates the most appropriate response and transmits it to the user through the speaker, who gives the impression of a vivid person audibly and visually. "

"Voice response feature saves time for the user"

Stating that the process is prolonged because the users of the search engines used in daily life have to search for answers between multiple pages, Bilge Turp Gölbaşı continued her words as follows: "This simulation saves time for the user with its voice question and voice answer feature. In this way, while increasing user satisfaction, it contributes to the potential of technology to make human life easier. Thus, users can communicate verbally and interactively."

RECTOR PROF. DR. BAHİRİ ŞAHİN MET WITH CANDIDATE STUDENTS AT THE "UNIVERSITY PREFERENCE FAİR İN İSTANBUL!"

The preference period for university candidate students has started. Participating in the "Istanbul Preference Fair" held at the Istanbul Congress Center, Rector Prof. Dr. Bahri Şahin both gave advice to prospective students and their families and gave valuable information about Istanbul Gelisim University.

Istanbul Gelisim University, Turkey's higher education institution with the highest number of internationally accredited programs, is also ranked 1st as a university with a graduation certificate with 45 TQF logos that provides international employment opportunities. Stating that 85 percent of the faculty programs and 50 percent of all programs are accredited, Rector Prof. Dr. Bahri Şahin advised students to choose for an accredited department.

Istanbul Gelisim University will continue to meet with prospective students at the Istanbul Congress Center on July 20-21.
