

AIRCRAFT TECHNOLOGY

Istanbul Gelisim University
Istanbul Gelisim Vocational School

“Our program is authorized by the Directorate General of Civil Aviation as a 'Recognized School' under SHY-147 and recognized for the SHY 66 A1 category. Students who successfully pass the module exams and complete their practices (tasks) are awarded the 'Recognized School Certificate' within the scope of SHT 147.”

Lect. Orkun ÖZSAVANER
Head of Aircraft Technology Program

Istanbul Gelisim
Meslek Yüksekokulu

The Aim of the Program

The aim of the program is to train staff to meet the needs of the civil aviation sector “Aircraft Technician”. Students who graduate from the Aircraft Technology program in line with the qualifications they have gained; They can work in manufacturing, maintenance-repair, project, planning, machine drawing, composite manufacturing and maintenance and construction related departments in enterprises serving in the aviation sector.

— “ —

Our students can take the 12 module exams required for the SHY 66 A1 category at our university and can also perform the tasks required for the SHY 66 A1 category at our school.

— ” —

Future of the Program

The main goal of the program is to train aircraft technology technicians who should closely follow the technology, who work and think in the light of scientific data at international standards, to meet the need for trained personnel for aircraft maintenance through the academic program and to train technical staff to work in aircraft maintenance companies in order to increase the quality of service in aviation.

Curriculum Information

Istanbul Gelisim University, Istanbul Gelisim Vocational School, Istanbul Gelisim Vocational School Aircraft Technology Program has a normal education period of two academic years and the total minimum credit amount to be completed depending on the student workload is 120 ECTS.

In the first two semesters, our students take the courses taught in common in our vocational school and the basic introduction to the field in a professional sense. Starting from the third semester, the focus is on vocational courses and our students begin to take elective courses as well as the compulsory courses required in the vocational sense.

Sectoral Collaborations

In its pursuit of excellence in education and research, our university attaches great importance to collaborating with public, private, and non-governmental organizations. These collaborations enable us to build a stronger future by sharing our knowledge and resources and working together to achieve common goals.

Internship

At the end of the second or fourth semester, our students advance their career journey by completing a 30-day summer internship to graduate.

Career Opportunities

Our students who graduate from the Aircraft Technology Program can work in corporate communication, brand communication, advertising, marketing and other communication departments of public or private organizations, media organizations, as well as social media management and communication consultancy.

Activities

Our university and our program contribute not only to gaining knowledge and skills but also to becoming an individual who will make his/her own difference and benefit the society. Our students have the opportunity to develop their skills in various workshops, learn by having fun at festivals, raise awareness in social responsibility projects and participate in unforgettable events, and have the chance to show themselves in competitions. Our activities develop cooperation and team skills. They also offer career opportunities.

The activities carried out are as follows:

- Workshops
- Festivals
- Trips
- Seminars
- Symposiums
- Exhibitions
- Social Responsibility Projects
- Conversations
- Sustainable Events

Double Major Opportunities

The purpose of the double major program is to enable students who complete their major programs to study in a second major program free of charge. Students with a GPA of 2.90 out of 4.00 in their major program and in the top 20% of their undergraduate/pre-degree program can start the second major diploma program free of charge.

Erasmus+ Program

With Erasmus+, the European Union's (EU) grant program in education, youth, and sports opportunities, our students can access various opportunities such as education, training, internship, professional development, and non-formal learning-based youth activities abroad.

Research Centers

Innovative, technological, and sociological studies are carried out in many branches, with 20 different applications and research centers within our university. In addition, thematic research groups carry out studies that will contribute to science in 10 different fields, from food to construction and automotive to health.

The IGU Technology Transfer Office, established to provide the necessary information and guidance for academicians, researchers, students, and graduates to start their own initiatives, listens to students who say, "I have a project," and provides all kinds of opportunities to realize these projects.

Workshops, Laboratories and Studios

- 6 Computer Laboratory-PC
- Computer Laboratory-MAC
- 2 Aircraft Systems Laboratory
- 2 Aircraft Engine Laboratories
- Aircraft Structural / Mechanical Laboratory
- Aircraft Electronics / Avionics Laboratory
- Civil Aviation Cabin Services Laboratory
- Aircraft Composite Workshop

DGS Course

Istanbul Gelisim Vocational School organizes the Vertical Transfer Examination (DGS) Course for our students free of charge every year. In the course, topics for DGS, especially basic mathematics and geometry, are covered.

Our students can register for our course, which is organized for second-year students of our vocational school, by applying on the announced dates and preparing for DGS free of charge.

English Course

Istanbul Gelisim Vocational School, which operates with the aim of increasing the human skills of our students within the framework of its vision of continuous development, opens professional English courses for our students. The aim of the courses is to provide education based on social sciences and natural sciences. In the lessons, our students' basic English knowledge is reinforced by studying field-specific English texts.

Our English courses are completely free and contribute to increasing the human skills of our students.
